1 Defendant Changpeng Zhao, by and through his undersigned counsel, respectfully submits
2 this Sentencing Memorandum in connection with his upcoming sentencing on April 30, 2024.

3 Mr. Zhao has pleaded guilty to a single offense: failing to establish an adequate anti-money
4 laundering (“AML”) program that complied with the Bank Secrecy Act (“BSA”) at Binance
5 Holdings Limited (“Binance” or the “Company”), a global business with more than 170 million
6 devoted users around the world who value its innovative products and services. Mr. Zhao deeply
7 regrets his offense, and he has shown exceptional acceptance of responsibility and remediation.
8 After transforming Binance into an industry leader on compliance and collaboration with law
9 enforcement, Mr. Zhao traveled to the United States voluntarily from a non-extradition country to
10 plead guilty and resigned from his role as Chief Executive Officer (“CEO”) of the Company. Since
11 then, he has remained in the United States, away from his home and family for over five months.

12 Mr. Zhao has paid massive fines. He directed the Company to plead guilty before this
13 Court and to resolve related civil charges with three federal agencies. [REDACTED]

14 [REDACTED]
15 [REDACTED] These factors strongly favor lenience. As Probation noted in the final paragraph of
16 its detailed presentence report (“PSR”): “[I]n contemplating a sentence outside of the advisory
17 guideline system, the Court may wish to consider the defendant’s exceptional acceptance of
18 responsibility, [REDACTED] the time the
19 defendant has spent in the United States, his lack of criminal history, the collateral consequences
20 of his status as a noncitizen, and the collateral consequence of Mr. Zhao stepping down as Binance
21 CEO.” PSR ¶ 156.

22 The charge to which Mr. Zhao pleaded guilty is a serious one, and Mr. Zhao’s public profile
23 coupled with the \$4.3 billion fine and forfeiture in Binance’s parallel corporate case has attracted
24 a high degree of media attention to this matter. [REDACTED]

25 [REDACTED] No defendant in a remotely similar BSA case has *ever*
26 been sentenced to incarceration. Mr. Zhao should not be the first.

Given the need to avoid unwarranted sentencing disparities, Mr. Zhao's extraordinary acceptance of responsibility [REDACTED], his long history of philanthropy and community service, the five and a half months he has already spent away from his family since pleading guilty, and the collateral consequences of his conviction, Mr. Zhao respectfully requests that the Court sentence him to probation.

I. CASE BACKGROUND

A. The Information and Guilty Plea

Mr. Zhao was not indicted, was not extradited, did not put the government to its burden of proof at trial, and never wavered in his steadfast commitment to accepting responsibility.

On November 14, 2023, the government filed a single-count Information charging Mr. Zhao with failing to maintain an effective AML program under the BSA, in violation of 31 U.S.C. §§ 5318(h) and 5322(b), (c), and (e). Dkt. 1 ¶¶ 1, 27. That same day, the government filed a parallel Information against Binance for failing to comply with provisions of the BSA and U.S. sanctions law. *U.S. v. Binance Holdings Ltd.*, No. 23-cr-178 (W.D. Wash. 2023), Dkt. 1.

On November 21, 2023, both Mr. Zhao and the Company pleaded guilty pursuant to written plea agreements. *See* Dkt. 31; *Binance*, No. 23-cr-178, Dkt. 21. The parties stipulated to a \$50 million fine for Mr. Zhao, pursuant to 31 U.S.C. § 5322(e), which the government agreed would be satisfied by Mr. Zhao’s payments to the Commodity Futures Trading Commission (“CFTC”) in his parallel resolution with that agency. PSR ¶ 5. Mr. Zhao completed payment of the \$50 million on January 9, 2024. He paid an additional \$50 million to the CFTC on March 4, 2024.

At his plea hearing, after traveling from his home in the United Arab Emirates (“UAE”) to the United States, Mr. Zhao expressed remorse and his intention to “take responsibility and close this chapter in my life.” Dkt. 40 at 3. Magistrate Judge Tsuchida accepted Mr. Zhao’s guilty plea and granted Mr. Zhao’s request that he be released on bail and permitted to return home to the UAE pending sentencing. *Id.*

1 On November 22, 2023, the government sought review of Judge Tsuchida’s decision,
 2 requesting that Mr. Zhao remain in the United States. Dkt. 34. On December 7, 2023, the Court
 3 granted the government’s motion and ordered Mr. Zhao to “remain in the continental United States
 4 during the period between his plea and sentencing,” Dkt. 46 at 6, which was later continued by
 5 two months at the government’s request, Dkt. 60. Mr. Zhao has abided by that order and his
 6 conditions of release fully, remaining in the United States away from his home, partner, and young
 7 children for five and a half months.

8 **B. Settlement of Multi-Agency Proceedings**

9 On November 21, 2023, in addition to its plea agreement, Binance also reached resolutions
 10 with the Office of Foreign Assets Control (“OFAC”) and the Financial Crimes Enforcement
 11 Network (“FinCEN”). Both Mr. Zhao and the Company also simultaneously agreed to resolve
 12 pending litigation with the CFTC. Pursuant to this multi-agency resolution, Mr. Zhao and the
 13 Company agreed to pay unprecedented total penalties of more than \$4.3 billion and continue
 14 implementing extensive compliance commitments, including installing independent monitors to
 15 oversee the Company’s compliance efforts for at least the next three years and cooperating with
 16 the U.S. government.¹ No. 23-cr-178, Dkt. 23, at 13-14, 21-23; PSR ¶¶ 44-46. Additionally, Mr.
 17 Zhao agreed to (and did) resign from his position as CEO of the company he founded and built
 18 from the ground up. No. 23-cr-178, Dkt. 23, at ¶ 8(f)(xiii).

19 The various resolutions, including the Company’s plea agreement, recognized the
 20 “significant steps” Binance has already taken, at Mr. Zhao’s direction, “to remediate its AML and
 21 sanctions compliance programs” years before the plea agreement. Dkt. No. 23, ¶¶ 8(f)-(g).² Mr.
 22 Zhao’s sentence should reflect that he personally set Binance on its corrective course before he
 23

24
 25 ¹ *Inside Binance’s Guilty Plea and the Biggest Fine in Crypto History*, THE WALL ST. J. (Nov. 24, 2023), available
 at <https://www.wsj.com/finance/inside-binances-guilty-plea-and-the-biggest-fine-in-crypto-history-e959fca0>.

26 ² See also OFAC Enforcement Release, at 7 (Nov. 21, 2023), available at <https://ofac.treasury.gov/media/932351/download?inline> (noting Binance’s “substantial cooperation” and “significant remedial measures” as mitigating factors).

1 resigned as CEO. The Company's extensive remedial measures under Mr. Zhao's leadership
2 underscore the extent of Mr. Zhao's acceptance of responsibility, even prior to his guilty plea.

3 **II. THE SENTENCING GUIDELINES**

4 **A. Stipulation**

5 Mr. Zhao's plea agreement sets forth the following stipulated Guidelines provisions:

- 6 • A base offense level of 8, pursuant to U.S.S.G. § 2S1.3(a)(1);
- 7 • A two-level increase for a conviction of an offense under Chapter 53 of Title 31,
8 United States Code, and involving more than \$100,000 in a twelve-month period,
pursuant to U.S.S.G. § 2S1.3(b)(2); and
- 9 • A four-level increase pursuant to U.S.S.G. § 3B1.1(a). PSR ¶ 3.

10 The plea agreement recognizes that Mr. Zhao qualifies for a two-level downward
11 adjustment for acceptance of responsibility pursuant to U.S.S.G. § 3E1.1(a), and if Mr. Zhao's
12 offense level is 16 or greater, the government has agreed to make the motion necessary to permit
13 the Court to subtract another level pursuant to U.S.S.G. §§ 3E1.1(a) and (b). Mr. Zhao has no
14 criminal history. PSR ¶ 71. Thus, his total offense level is 12, and the advisory Guideline range
15 is 10 to 16 months. Probation agrees with this calculation. *Id.* ¶¶ 68, 144.

16 **B. The Proceeds of Unlawful Activity Enhancement is Not Applicable**

17 The parties agreed that they are free to present argument as to the applicability of a two-
18 level increase for proceeds of unlawful activity. PSR ¶ 4. This enhancement applies only if "the
19 defendant knew or believed that the funds were proceeds of unlawful activity, or were intended to
20 promote unlawful activity." U.S.S.G. § 2S1.3(b)(1). Probation has declined to apply this
21 enhancement. PSR ¶¶ 60-68.

22 There is no factual or legal basis to support the enhancement. Courts—including in this
23 District—describe the relevant *mens rea* standard as heightened, referring to this provision as "the
24 deliberate knowledge enhancement." *See Rombakh v. U.S.*, 2015 WL 4483961, at *1-3 (W.D.
25 Wash. July 21, 2015). As such, courts have applied § 2S1.3(b)(1) when a defendant was *explicitly*
26 *informed* that specific funds were in fact the proceeds of other criminal activity, not merely when

1 it was unclear whether the defendant knew the relevant funds constituted criminal proceeds. *See*,
 2 *e.g.*, *Walker v. U.S.*, 2012 WL 4675447, at *1, 5 (N.D. Cal. Sept. 27, 2012) (applying § 2S1.3(b)(1)
 3 in a structuring prosecution where defendant knew funds were derived from selling counterfeit
 4 software); *see also U.S. v. Singh*, 995 F.3d 1069, 1081-82 (9th Cir. 2021) (applying
 5 § 2S1.1(b)(1)—a different enhancement with the same heightened knowledge standard—in a
 6 money laundering prosecution where defendant knew specific funds were derived from illicit drug
 7 dealing, because a witness explicitly told defendant the “money was from . . . drugs”); *cf. U.S. v.*
 8 *Beaman*, 128 F. Supp. 2d 1188, 1190-93 (N.D. Ind. 2001) (enhancement did not apply in a
 9 structuring prosecution because the defendant did not know the source of the funds at issue, even
 10 though his business dealings were “certainly less than cautious”). Indeed, the Probation Office
 11 noted the requirement that a defendant have “explicit knowledge that funds were in fact the
 12 proceeds of other criminal activity” in other cases it identified in this Circuit as well. Addendum
 13 to the PSR, at 49.

14 Here, there is no evidence that Mr. Zhao was *explicitly informed* of any specific transaction
 15 or circumstances in which an identified user transacted on Binance with criminal proceeds.
 16 Generalized awareness, statistical probability, or “reasonable foreseeab[ility],” as described in his
 17 plea agreement, are insufficient.

18 The Court cannot apply this enhancement based on the mere fact that Mr. Zhao may have
 19 been aware of gaps or weaknesses in the Company’s compliance controls. Generalized knowledge
 20 that the Company’s compliance program did not eliminate all risk of criminal activity does not
 21 mean that Mr. Zhao knew or intended for any funds to be criminally derived (he manifestly did
 22 not). If such generalized knowledge were sufficient, this enhancement would apply in every case
 23 involving any financial institution that audits and enhances its compliance program. But in fact,
 24 even in cases involving more severe actions than Mr. Zhao’s, the enhancement is not applied. *See*
 25 *U.S. v. Hayes, et al.*, No. 20-cr-500 (S.D.N.Y. 2020) (no enhancement even though the government
 26 made allegations not found here, such as that the defendant had personally “communicated directly

1 with BitMEX customers who self-identified as being based in Iran”);³ *U.S. v. Ofer*, No. 21-cr-174
2 (E.D.N.Y. 2023).

3 The government is wrong that this enhancement requires only that a defendant
4 “consciously avoided” knowledge that funds were proceeds of unlawful activity. In its response
5 to the draft PSR, the government cited this standard using a decades-old case from the Second
6 Circuit to support its proposition. *See* Addendum to the PSR, at 42. As demonstrated by the cases
7 cited above, “conscious avoidance” is simply not the test in this Circuit and cannot meet the
8 “deliberate knowledge” standard required here. Moreover, even if “conscious avoidance” were
9 the appropriate test, the government has not offered evidence to satisfy even that standard. In the
10 case on which the government relies, *U.S. v. Finkelstein*, 229 F.3d 90 (2d Cir. 2000), the defendant
11 was an active participant in an extensive money laundering conspiracy who (1) told the district
12 court judge that he knew the funds were the proceeds of unlawful activity and (2) explicitly told
13 law enforcement that he suspected the money he laundered arose from narcotics trafficking.
14 *Finkelstein*, 229 F.3d at 92-97.

15 The facts of *Finkelstein* contrast starkly with Mr. Zhao’s case. Not only was Mr. Zhao
16 never personally involved in any illicit activity, the record shows that he invested significant time
17 and resources into building the most impactful compliance and law enforcement collaboration
18 function in the industry. *See infra* Section IV.C.2.

19 Nor is it sufficient that, as per the plea agreement, it was “reasonably foreseeable” that
20 Binance’s automated matching engine—a software program that matches customer bids and offers
21 to execute cryptocurrency trades based only on the price indicated and the time submitted—would
22 or could match U.S. users with counterparties in sanctioned jurisdictions. Dkt. 31, ¶ 9(m). The
23 standard for § 2S1.3(b)(1) is not reasonable foreseeability; it is specific and “deliberate”
24 knowledge or belief. *See Rombakh*, 2015 WL 4483961, at *1-3. To warrant this enhancement,

25
26 ³ *See Founders Of Cryptocurrency Exchange Plead Guilty To Bank Secrecy Act Violations*, DOJ Press Release (Feb. 24, 2022), available at <https://www.justice.gov/usao-sdny/pr/founders-cryptocurrency-exchange-plead-guilty-bank-secrecy-act-violations>; *U.S. v. Hayes et al.*, No. 20-cr-500 (S.D.N.Y. 2020), Dkt. 2, ¶ 24.

1 the facts would also need to demonstrate that Mr. Zhao himself knew or believed that his conduct
2 involved the proceeds of specific U.S. sanctions violations. He did not.

3 Although Probation references a conversation in which Binance’s chief compliance officer
4 warned Mr. Zhao that there were users from sanctioned countries on Binance.com, *see* Sentencing
5 Recommendation, at 6, the reality is that Binance, as a non-U.S. company, was not prohibited from
6 having users from U.S.-sanctioned countries on its platform. By contrast, the sanctions charge to
7 which the Company pleaded is a novel and narrow one (applied for the first time against Binance)
8 that an algorithmic matching engine violates U.S. sanctions law by randomly pairing users in
9 sanctioned countries with users in the United States. These random, automated transactions
10 between U.S. users and counterparties in sanctioned countries accounted for a miniscule
11 percentage (0.00041%) of overall trading volume on Binance. Given how incredibly rare they
12 were, it is inconceivable that Mr. Zhao acted knowingly and deliberately to bring them about. In
13 fact, in the very same chat noted by Probation, when asked whether Binance would proceed to
14 block IP addresses from sanctioned countries, Mr. Zhao responded “yes, let’s do it.” And as the
15 PSR notes, the government “has not offered specific instances of explicit or deliberate knowledge
16 or belief, by the defendant, that funds processed through his exchange were proceeds of unlawful
17 activity”—including as to any sanctions activity. Addendum to the PSR, at 50.

18 Further, any argument premised on the notion that cryptocurrency (generally) or Binance
19 (in particular) might be used for illicit purposes is similarly insufficient. There is ample research
20 that transactions involving illicit conduct represent only a small portion of the cryptocurrency
21 industry’s total volume, and this holds true at Binance as well.⁴ Probabilistic reasoning from

22
23 ⁴For example, transactions involving illicit accounts represented just 0.15% of cryptocurrency transaction volume in
24 2021; in fact, “illicit activity’s share” of total volume “has never been lower.” Chainalysis Team, *Crypto Crime*
25 *Trends for 2022: Illicit Transaction Activity Reaches All-Time High in Value, All-Time Low in Share of All*
26 *Cryptocurrency Activity*, CHAINALYSIS (Jan. 6, 2022), available at <https://www.chainalysis.com/blog/2022-crypto-crime-report-introduction/>; *see, e.g.*, Europol, *Cryptocurrencies – Tracing the evolution of criminal financing*, Europol Spotlight Report series, Publications Office of the European Union, Luxembourg (2021) (“The overall number and value of cryptocurrency transactions related to criminal activities still represents only a limited share of the criminal economy when compared to cash and other forms of transactions.”); *see also* BAE Systems, *Follow the*

1 statistical anomalies is not a proper basis for applying an enhancement that requires specific
2 knowledge.

3 For all of these reasons, the illicit funds enhancement does not apply, and the advisory
4 Guideline range is 10 to 16 months.

5 **III. APPLICABLE LAW**

6 Mr. Zhao's sentence must be "sufficient, but not greater than necessary" to accomplish the
7 specified goals of sentencing. 18 U.S.C. § 3553(a)(1)-(2); *see Kimbrough v. U.S.*, 552 U.S. 85,
8 101 (2007). The first step is the calculation of the advisory Guideline range, which should provide
9 the "starting point and the initial benchmark." *Peugh v. U.S.*, 569 U.S. 530, 536 (2013) (quoting
10 *Gall v. U.S.*, 552 U.S. 38, 49 (2007)). The court must then consider "the nature and circumstances
11 of the offense and the history and characteristics of the defendant" to make an "individualized
12 assessment" of an appropriate sentence under the statute. 18 U.S.C. § 3553(a)(1); *Gall*, 552 U.S.
13 at 50. Critically, the sentencing court must also consider "the need to avoid unwarranted
14 sentencing disparities among defendants with similar records who have been found guilty of
15 similar conduct." 18 U.S.C. § 3553(a)(5)-(6).

16 A sentence of probation is appropriate for Mr. Zhao. As discussed above, the advisory
17 Guideline range, properly calculated, is 10 to 16 months of imprisonment. That is the starting
18 point for the Court's analysis. From there, the Probation Office recommends that the Court vary
19 downward to impose a sentence of five months' imprisonment based on mitigating factors that
20 include Mr. Zhao's "lack of criminal history, his extraordinary acceptance of responsibility, the
21 collateral consequences of the prosecution, and the fact that he does not seem to be a continued
22 danger to the community," as well as the reality that Mr. Zhao "has already been in the United
23 States for a significant time, without his family and unable to leave, as he awaits sentencing."
24 Sentencing Recommendation, at 2, 7, 11.

25
26

 Money, SWIFT (2020), available at https://www.swift.com/sites/default/files/files/swift_bae_report_Follow-The%20Money.pdf ("Identified cases of laundering through cryptocurrencies remain relatively small compared to the volumes of cash laundered through traditional methods.").

1 Mr. Zhao thanks Probation for its thoughtful, diligent work in this case. He agrees that a
 2 downward variance is appropriate to reflect his status as a first-time, nonviolent offender; the lack
 3 of any meaningful risk of recidivism; the nature of the offense conduct; Mr. Zhao's personal
 4 history and characteristics, which include his devotion to his young family and extensive charitable
 5 works; his extraordinary acceptance of responsibility; the five and a half months he has already
 6 spent in the United States away from his home and family; and the additional time he would spend
 7 in the custody of Immigration & Customs Enforcement ("ICE") for removal proceedings following
 8 any period of incarceration. But Probation's recommendation does not adequately take into
 9 account three additional, critically important factors: (a) [REDACTED]
 10 [REDACTED]; (b)
 11 the lack of precedent for sentencing *any* similar defendant to incarceration; and (c) the more severe
 12 conditions of incarceration Mr. Zhao would face as compared to a similarly situated U.S. citizen,
 13 solely on account of his status as a non-citizen. These factors, on top of the other mitigating factors
 14 identified by the Probation Office, are grounds for the Court to vary downward to a sentence of
 15 probation.⁵

16 This is a high-profile case, to be sure. But Mr. Zhao is not a symbol. He is a devoted
 17 father, a philanthropist, [REDACTED]. He has already shown remorse for his offense and, more
 18 importantly, has remediated. When this Court assesses Mr. Zhao fairly, as a person, and based
 19 solely on the facts of his case, it should conclude that the just and appropriate result is probation.

20 **IV. MR. ZHAO SHOULD BE SENTENCED TO PROBATION**

21 **A. The Nature and Circumstances of the Offense**

22 It is important to contextualize Mr. Zhao's acceptance of responsibility against what his
 23 charge includes and what it *does not* include. Mr. Zhao has been convicted *only* of an AML
 24 compliance failure. He has not pleaded guilty to—nor has the government alleged that he
 25 _____

26 ⁵ Even under the Guidelines, because Mr. Zhao's offense level of 12 places him at the lowest level of Zone C, a sentence of probation would require a variance of just a single offense level to 11, which is Zone B. *See* U.S.S.G. § 5B1.1. The factors above more than justify such a variance.

1 committed—any crime involving money laundering, fraud, theft, market manipulation, or any
2 comparable form of unlawful conduct. He has not defrauded any investors, and there has been no
3 misappropriation of any customer assets. *See* Sentencing Recommendation, at 9 (noting that “in
4 contrast to other, recent prosecutions that involved cryptocurrency exchanges, the conduct at issue
5 here did not involve stealing, spending, or investing customers’ money”); PSR ¶ 53 (noting
6 “[t]here are no identifiable victims in this case”).

7 It is equally important to balance Mr. Zhao’s offense against his efforts—imperfect as they
8 were—to build a compliance program at Binance in an evolving regulatory environment. In its
9 sentencing recommendation, Probation highlighted a handful of communications from the relevant
10 period, including a chat from September 2019 in which Mr. Zhao wrote: “If we blocked US users
11 from day 1, Binance will not [sic] as big as we are today. We would also not have had any US
12 revenue we had for the last 2 years. And further, we would not have had additional revenue
13 resulted from the network effect . . . better to ask for forgiveness than permission” in what Mr.
14 Zhao described as a “grey zone.” Sentencing Recommendation, at 5. Even so, despite a lack of
15 “definite information” concerning the U.S. regulatory regime in 2019, Mr. Zhao stressed at the
16 time that Binance should “proactively” block U.S. users rather than “wait for the U.S. regulators
17 to come to us,” noting that he wanted to “minimize the impact and keep the business to the extent
18 possible” while “being compliant.”

19 Likewise, in February 2021, Mr. Zhao publicly stated that Binance “wanted to be compliant
20 everywhere we can.” And for the past several years, as set forth in detail in the PSR, *see* PSR ¶¶
21 48–50, and summarized in Section IV.C.2 below, Mr. Zhao and Binance have devoted enormous
22 resources to building an industry-leading compliance program. The plea agreements and other
23 agency resolutions memorialize those measures and Binance’s commitment to them, as well as the
24
25
26

1 government's compliance expectations,⁶ providing for the first time a detailed roadmap and model
2 for others in this global industry.

10 **C. Mr. Zhao's Personal History and Circumstances Support Lenience**

11 Mr. Zhao is a forty-seven-year-old first-time offender. His life has been built on three

12 pillars: devotion to his family, developing technology (and especially Binance) as a force for

13 positive change in the world, and serving the greater good.

14 **1. Mr. Zhao's Devotion to His Family**

15 Family is, and always has been, Mr. Zhao's highest priority. He was born in a rural village

16 in China's Jiangsu province, where his mother worked as a teacher and his father maintained the

17 electrical network for the village's loudspeaker system. When Mr. Zhao was twelve, the family

18 emigrated to Vancouver, Canada, in the wake of the Tiananmen Square massacre. PSR ¶¶ 83-84.

19 After arriving in Canada, Mr. Zhao's mother worked at a clothing factory, and his older sister soon

20 began working as a cashier at McDonald's. While his father pursued a degree, Mr. Zhao took any

21 position he could to help his family.⁸ He began working at McDonald's with his sister when he

22 was 14, and later took on other part-time jobs as a teenager, including as a dishwasher at a local

26 ⁸ *Who is Binance founder Changpeng 'CZ' Zhao, the billionaire who wants to 'rebuild' crypto?*, CNN (Nov. 15, 2022), available at <https://www.cnn.com/2022/11/15/business/binance-founder-changpeng-zhao-ftx-intl-hnk/index.html>.

1 amusement park, a night shift clerk at a gas station, and a referee at volleyball games. PSR ¶¶ 88-
2 89.

3 In 2003, Mr. Zhao married his then-partner, Weiqing (Winnie) Yang, and the couple soon
4 welcomed two children, a son and a daughter. Friends who knew Mr. Zhao during this time recall
5 that he was a “dedicated husband and father.” Ex. B (B-9), Ltr. from J. and T. Tsai, at 2. Ms.
6 Yang describes how “he has taken the greatest care of [her] and [their] children.” Ex. B (A-5),
7 Ltr. from W. Yang, at 2. She continues: “I still clearly remember that during the infancy and early
8 childhood of our children after they were born, [Mr. Zhao] tried his best to be with our children as
9 much as he could and rarely missed any chances to personally take care of the children, such as
10 changing diapers, feeding milk, [and] traveling with [them].” Ex. B (A-5), Ltr. from W. Yang, at
11 2. Mr. Zhao’s commitment to his children endured as they grew older, even after he and Ms. Yang
12 separated. His eldest daughter notes that her father’s “unwavering commitment to [her] wellbeing
13 was very evident through his advices and encouragement,” even when they were apart from one
14 another. Ex. B (A-3), Ltr. from R. Zhao, at 2. She and Mr. Zhao’s eldest son cherished their
15 father’s “unconditional love” and “guidance.” Ex. B (A-3), Ltr. from R. Zhao, at 1; Ex. B (A-4),
16 Ltr. from R. Zhao, at 1.

17 In 2019, Mr. Zhao and his current partner, Ying (Yi) He, welcomed their first child. Two
18 more children soon followed. Even at the height of his entrepreneurial success, Mr. Zhao’s family
19 remained the foundation of his life. In 2021, when the crypto market and trading volumes were at
20 record highs, a friend visited Mr. Zhao’s and Ms. He’s three-bedroom apartment in Singapore
21 where “[m]ost of the living area was covered with play mats for his children with toys scattered
22 all around,” and recalls that as Mr. Zhao’s young son was playing, “he would turn to his father
23 every few minutes like clockwork to get a reassuring nod of approval.” Ex. B (C-7), Ltr. from R.
24 Teo, at 2, 4. Mr. Zhao’s three young children with Ms. He, including the couple’s nine-month-old
25 baby, live in the UAE. PSR ¶ 117. Mr. Zhao has not seen them since traveling to the United States
26 to plead guilty, and he misses them dearly. He has missed half of his youngest child’s life,

1 including many “firsts.” As a loving and present father, this extended period of separation from
 2 his young children has, in its own way, already been a part of Mr. Zhao’s sentence.

3 **2. Mr. Zhao Built Binance as a Force for Positive Change**

4 **(a) The Vision Behind Binance**

5 Mr. Zhao was an early cryptocurrency adopter because “he believed, and continues to
 6 believe, that this technology will transform the world.” PSR ¶ 103. Mr. Zhao’s interest was driven
 7 by the “inclusiveness and equal opportunity [cryptocurrency] provides to everyone in the world.”
 8 Ex. A, Ltr. from C. Zhao to Judge Jones, at 2. He truly “believed . . . that this technology would
 9 help the underprivileged and the oppressed.” Ex. B (B-10), Ltr. from P. Wang, at 1. A friend
 10 recalls that Mr. Zhao aimed to “build a world-changing company that focused on financial trust
 11 and security,” and “wanted to devote the next chapter of his career to [cryptocurrency] and its
 12 capacity to reshape society for good.” Ex. B (B-1), Ltr. from R. Cao, at 1. His hope was, and
 13 remains, “to use technology to advance the world.” Ex. B (A-2), Ltr. from Y. He, at 5.

14 In March 2017, Mr. Zhao began to develop the idea that would eventually become Binance.
 15 The goal from the outset was to develop a streamlined cryptocurrency exchange that could provide
 16 a “more frictionless user experience” without sacrificing stability and security, and to make that
 17 technology available to everyone, including people in underdeveloped countries without access to
 18 a traditional, reliable banking system.⁹

19 In June 2017, Mr. Zhao and his colleagues—who had significant engineering, technology,
 20 and product development experience, but little to no background in U.S. regulation or
 21 compliance—launched Binance from Shanghai. PSR ¶ 108. The Company was founded with the
 22 core mission to “spread the freedom” of money around the globe while protecting user funds
 23 through platform stability and technical security.¹⁰ As Mr. Zhao’s sister describes it, there were
 24

25 ⁹ *Who Is Guangying Chen, and Is Binance a “Chinese Company”?*, BINANCE (Sept. 1, 2022), available at

¹⁰ *The Meteoric Rise of Crypto Exchange Binance*, EPICENTER (May 16, 2018), available at
<https://epicenter.tv/episodes/235/>.

1 “two main consideration points in every discussion” in early meetings at Binance: “keeping
2 customer funds safe, and what makes the best service.” Ex. B (A-1), Ltr. from J. Zhao, at 1-2.

3 When it first launched, Binance was a small startup, with a small team of about thirty
4 people, that provided only crypto-to-crypto spot exchange services (in other words, exchanging
5 one cryptocurrency for another). This time in Mr. Zhao’s life was “very hectic” and the “highest
6 pressure period in his life, apart from his current circumstances.” PSR ¶¶ 108-09. He recalls a
7 total lack of sleep and losing 15 pounds in a month. PSR ¶ 109. Through hard work, the exchange
8 grew exponentially; within the first three months, Binance reported a daily transaction volume of
9 \$500 million. PSR ¶ 111.

10 Yet the exchange almost died in its earliest days when, in September 2017, the Chinese
11 government banned all crypto exchanges from operating in China. Mr. Zhao was once again
12 forced to abandon his life in China, approximately 30 years after his parents fled from persecution
13 during the Cultural Revolution. And because many of the projects that had tokens on Binance did
14 not have funds to repay their investors, Mr. Zhao agreed to cover those costs for all mainland users
15 despite the fact that doing so required 40% of all of Binance’s own assets. PSR ¶ 112. It was of
16 paramount importance to Mr. Zhao to guarantee the safety of users, a tenet that continues to be a
17 chief operating principle of Binance today. Ex. B (D-25), Ltr. from J. Jakubcek, at 2.

18 The Company and its approximately 30 employees uprooted from their base and moved to
19 Tokyo a few months after launch. PSR ¶ 113. Although most exchanges concentrated exclusively
20 on developed countries to maximize revenues, Mr. Zhao’s focus included reducing financial
21 inequalities globally and investing heavily in developing countries in Africa, Asia, and South
22 America. *See, e.g.*, Ex. B (E-3), Ltr. from R. Bibi, at 2.¹¹ Binance has positively influenced
23 millions globally and allowed countless unbanked individuals to participate in a transformative
24 financial revolution. Ex. B (F-8), Ltr. from H. Mokhtafa, at 2. As one blockchain entrepreneur
25

26 ¹¹ Among the hundreds of letters of support submitted for Mr. Zhao, there are numerous letters from individuals around the world that attest to this focus and the value that Binance and Mr. Zhao have provided to them. *See generally* Ex. B.

1 writes, Mr. Zhao’s “leadership transformed Binance into a cradle of innovation, opening the world
2 of digital economy to millions,” and “[h]is dedication to demystifying cryptocurrency has shattered
3 barriers, bringing financial empowerment to those sidelined by traditional systems.” Ex. B (G-8),
4 Ltr. from M. Guan, at 1.

5 (b) Binance’s Early Days and Compliance Efforts

6 Binance continued to grow at an unexpected and difficult-to-manage pace. An additional
7 “couple of million” users joined every week; at one point in early 2018, 240,000 people signed up
8 in a single hour.¹² This growth occurred against a backdrop of an uncertain and evolving
9 regulatory environment. As the user base continued to grow around the world, governments
10 struggled (and continue to struggle) to settle on the proper approach to regulate this new
11 technology.¹³ Particularly in its early, rapid-growth phase, Binance also had to contend with a
12 host of evolving and complex technological challenges.

13 It was in this environment that Mr. Zhao and Binance, regrettably, prioritized growth over
14 compliance with the U.S. regulatory requirement at issue. Mr. Zhao was aware that U.S. users
15 were on the platform, but “failed to appreciate the magnitude” of that fact. PSR ¶ 118. Today, of
16 course, Mr. Zhao “recognizes that he could have, and should have, done a better job” implementing
17 a U.S.-compliant AML program, or more quickly facilitating the transition of U.S. users off of the
18 global exchange when it did not have an AML program in place that complied with U.S. law. PSR
19 ¶ 118. Mr. Zhao acknowledges and accepts responsibility for that failing.

22 ¹² *World’s top-ranked crypto venue added 240,000 users in one hour*, MINT (Jan. 11, 2018), available at

1 He did not fail to act entirely, however. Quite the contrary: Mr. Zhao worked to hire
 2 compliance personnel with experience in U.S. law and compliance, and in mid-2019 he launched
 3 Binance.US, a separate, U.S.-based version of the exchange that was compliant with U.S. AML
 4 requirements. And although Binance’s global efforts fell short of the U.S. requirements, during
 5 this time the Company worked diligently to secure regulatory licenses from more than a dozen
 6 countries across the world,¹⁴ demonstrating a respect for and engagement with regulatory
 7 processes that continues today. This came with much higher regulatory costs, but Mr. Zhao “was
 8 willing to accept lower financial returns and a competitive disadvantage in exchange for showing
 9 the world that Binance and cryptocurrencies can and should [abide by] rules and regulations.” Ex.
 10 B (D-17), Ltr. from N. Fuwattananukul, at 2.

11 The General Manager for Binance in Thailand echoes that Mr. Zhao “understood that for
 12 this cryptocurrency industry to grow, it had to be regulated in order to become legitimate and
 13 accepted by the wider population and not some new elusive technology that was outside the law.”
 14 Ex. B (D-17), Ltr. from N. Fuwattananukul, at 2. Over the course of 2021 and 2022, Binance
 15 worked with specialized third parties to support its compliance programs and spent more than \$80
 16 million on compliance-related vendors. Additionally, Binance implemented a number of AML
 17 programs, enhanced its due diligence of platform users, established a comprehensive sanctions
 18 policy and conducted a lookback to identify sanctioned users, created a quality assurance team to
 19 assess whether KYC and customer due diligence measures were being implemented consistently
 20 and accurately, updated AML training for employees, and tightened its controls to prevent U.S.
 21 users from accessing its platform. PSR ¶ 48. As noted above, the DOJ and other government
 22 agencies have recognized these measures and the Company’s continuous efforts to enhance its
 23 compliance program. *See supra*, at Section I.B. The result, as CEO of Binance France SAS, David
 24 Princay, notes, is that Mr. Zhao “has consistently focused on adapting strategies to meet regulatory
 25

26 ¹⁴ *Binance*, No. 23-cr-178, Dkt. 33 at 5 (“Among other things, the government well knows that in the years leading up to this resolution, BHL and its sister corporate entities had obtained licenses in more than a dozen foreign jurisdictions.”).

1 requirements, positioning Binance as the first global exchange to be regulated.” Ex. B (D-48), Ltr.
 2 from D. Princay, at 1.

3 As described by Tigran Gambaryan, Binance’s Head of Financial Crime Compliance—
 4 who joined Binance in September 2021, after serving for ten years as a Special Agent at the Internal
 5 Revenue Service (“IRS”) focusing on significant cryptocurrency cases—it is clear that with
 6 Binance’s compliance program, Mr. Zhao sought “not just oversight,” but “to raise Binance’s
 7 compliance to a standard of excellence.” Ex. B (D-18), Ltr. from T. Gambaryan, at 2. Indeed, Mr.
 8 Zhao personally chose Mr. Gambaryan to lead Binance’s investigations team to ensure exemplary
 9 service to law enforcement and a secure, compliant cryptocurrency ecosystem. Ex. B (D-25), Ltr.
 10 from J. Jakubcek, at 2. Ultimately, while Mr. Zhao and Binance did not move swiftly enough with
 11 respect to U.S. BSA requirements, the compliance enhancements implemented under Mr. Zhao’s
 12 leadership have resulted in Binance’s best-in-class AML/KYC program today. *See* PSR ¶¶ 48-52.

13 (c) Mr. Zhao and Binance as Forces for Good in Cryptocurrency

14 As the regulatory landscape for digital assets has evolved in recent years, Mr. Zhao has
 15 continued to push Binance toward being the industry leader on compliance and regulation. And
 16 as Binance has built a best-in-class compliance program, it has grown to be a trusted partner and
 17 resource for law enforcement worldwide. Since the early days of the Company, Mr. Zhao has
 18 “personally pushed for the exchange to work closely with the international law enforcement
 19 community, resulting in much higher compliance costs.” Ex. B (D-25), Ltr. from J. Jakubcek, at
 20 1. His leadership has been pivotal for Binance’s ability to collaborate with government agencies,
 21 including his decision to implement global KYC requirements for all users—a process
 22 implemented in full in 2022, making Binance one of the first international cryptocurrency
 23 exchanges to do so and its program the most comprehensive. One result of that decision is that
 24 Binance now has one of the richest sources of digital transaction data in the world, with each
 25 account tied to an identifiable user who has undergone KYC—an invaluable resource to law
 26

1 enforcement. This is in stark contrast to other international cryptocurrency exchanges, many of
2 whom require KYC on only a subset of customers or not at all.

3 Law enforcement has benefited, and continues to benefit, greatly from Binance’s data and
4 assistance. Mr. Zhao was the impetus for Binance’s proprietary Law Enforcement Request
5 System, announced in 2021, which provided a platform where law enforcement officials and other
6 government agents could make and track formal electronic requests of the Company and ongoing
7 investigative assistance.¹⁵ In 2021, Binance received a total of 19,879 requests for assistance or
8 information from law enforcement. In 2022, that number skyrocketed to 58,507. And last year,
9 Binance received more than 60,000 requests, with 9,390 originating from law enforcement
10 officials in the United States. PSR ¶ 49. This extensive support from the Company at Mr. Zhao’s
11 direction has led to seizures of hundreds of millions of dollars. In 2023 alone, Binance assisted
12 law enforcement with the seizure of more than \$400 million—and of that total, more than \$350
13 million were seizures processed by Binance on behalf of U.S. authorities. PSR ¶ 51. To state the
14 obvious, a company (or CEO) that disregards compliance or U.S. law entirely would not take these
15 steps.

16 In addition, over several years, the Company has significantly invested in its legal and
17 compliance teams by hiring hundreds of specialists, “including former law enforcement officers,
18 federal prosecutors, regulators, cryptocurrency and fintech compliance experts, and banking
19 compliance professionals.” PSR ¶¶ 49-50. These teams have worked to build both “proactive and
20 reactive systems” to assist and support law enforcement worldwide. PSR ¶ 50. “Binance has
21 always been one of the most responsive exchanges and one that has provided investigators and
22 prosecutors with more practical information than other exchanges, going far beyond the required
23 degree of cooperation.” Ex. B (D-25), Ltr. from J. Jakubcek, at 1.

24
25
26 ¹⁵ *Hear from CZ: Our Approach To User Protection and Proactive Compliance*, Binance Blog (Sept. 24, 2021),
available at <https://www.binance.com/en/blog/from-our-ceo/hear-from-cz-our-approach-to-user-protection-and-proactive-compliance-421499824684902811>.

1 Mr. Zhao's and Binance's collaboration with law enforcement has specifically sought to
 2 address the threat of terrorism across the globe. In 2023, Binance collaborated with law
 3 enforcement agencies from 48 countries, including the United States, relating to ongoing terrorism
 4 investigations. Notably, a substantial amount of this collaboration was proactively initiated by
 5 Binance's in-house investigations team, resulting in the identification and referral to law
 6 enforcement of more than 2,157 on-chain cryptocurrency addresses suspected of association with
 7 terrorist-financing activities. As a result, and in partnership with the appropriate law enforcement
 8 entities, Binance has taken action against financing operations associated with radical terrorist
 9 groups, including Hamas, Al-Qaeda, ISIS, and Hezbollah.

10 Beyond disrupting potential financing of terrorism, the Company's assistance has also
 11 provided the information and evidence necessary for the United States and other governments to
 12 bring bad actors to justice. Mr. Zhao is committed to "work[ing] with regulators . . . on a global
 13 scale, in a way that [is] fully transparent and secure." Ex. B (D-50), Ltr. from V. Sacheendran, at

14 1. [REDACTED]

15 [REDACTED]

16 [REDACTED]

17 [REDACTED] And the Company has been
 18 instrumental in counteracting other major high-risk entities, including the sanctioned Russia-based
 19 entity, Suex OTC.¹⁶ As Mr. Gambaryan writes: "Our collective success, which now includes
 20 supporting victims of kidnapping and disrupting terrorist financing, is a testament to [Mr. Zhao]'s
 21 investment in our mission." Ex. B (D-18), Ltr. from T. Gambaryan, at 2.

22 Mr. Zhao and Binance have also prioritized the formation of programs designed to provide
 23 training and assistance to international law enforcement authorities. For example, in 2022 (long
 24 before his guilty plea), Mr. Zhao directed the Company to establish a Global Law Enforcement
 25

26 ¹⁶ *Innovation, Regulation, & the Future of the Crypto Industry*, BINANCE (Sept. 22, 2021), available at
<https://www.binance.com/en/blog/ecosystem/innovation-regulation-and-the-future-of-the-crypto-industry-421499824684902798>.

1 Training Program aimed at assisting law enforcement in detecting financial and cyber-crimes.¹⁷
 2 In 2022 and 2023 alone, the program hosted over 180 anti-cybercrime workshops and training
 3 sessions with members of global law enforcement agencies across Asia, Europe, and the
 4 Americas.¹⁸ “Despite the cost implications that would dissuade any other exchange CEO, [Mr.
 5 Zhao] has, like in many other circumstances, decided to push for the positive impact, encouraging
 6 practical education.” Ex. B (D-25), Ltr. from J. Jakubcek, at 2.

7 Under Mr. Zhao’s leadership, Binance has built close working relationships with the U.S.
 8 Director of National Intelligence’s National Counterterrorism Center; the Department of Defense;
 9 the Federal Bureau of Investigation’s (“FBI”) Counterterrorism Division; and the Department of
 10 Homeland Security, among many others. The Company frequently receives messages of gratitude
 11 and appreciation from its partners in law enforcement, both for assisting in specific cases as well
 12 as for the numerous training programs the Binance team offers to law enforcement personnel
 13 worldwide. For example, one 2023 email from a Colorado Chief Deputy District Attorney
 14 described how, “[o]n incredibly short notice,” Binance flew in a team member to testify in the first
 15 cryptocurrency case in Colorado, testimony that the government attorney emphasized “saved our
 16 entire case.” The District Attorney went on to write that “without your help and [the Binance
 17 witness]’s willingness to come save us, we would not have been able to admit the records. . . . I
 18 would love to have an opportunity to debrief with your team about what I learned during these
 19 cases and what issues we had.” Email from Co. Chief Deputy Dist. Att’y, at 1-2. A similar email
 20 from the FBI touts the Company’s expeditious response to law enforcement, stating “[t]he
 21 company has the quickest response time out of any company I have subpoenaed in my 13+ years

22

Binance Shares Cyber-Policing And Investigative Expertise with INTERPOL, Binance Blog (Feb. 9, 2024), available
 at [https://www.binance.com/en/blog/ecosystem/binance-shares-cyberpolicing-and-investigative-expertise-with-](https://www.binance.com/en/blog/ecosystem/binance-shares-cyberpolicing-and-investigative-expertise-with-interpol-8801759366914474386)
[interpol-8801759366914474386](https://www.binance.com/en/blog/ecosystem/binance-shares-cyberpolicing-and-investigative-expertise-with-interpol-8801759366914474386).

1 in law enforcement.” Email from FBI Austin, at 1. And the European Commission expressed its
 2 appreciation for the Company’s presentation on countering terrorism financing by stating in a letter
 3 that “[Binance’s] willingness to engage in meaningful dialogue and address questions from the
 4 participants demonstrated your dedication to fostering a deeper understanding of the possibilities
 5 and solutions available to counter terrorism financing.” Letter from European Commission, at 1.

6 Most recently, at the Blockchain Association Policy Summit on November 29-30, 2023, a
 7 panel on cryptocurrency and U.S. national security consisting of representatives from FinCEN,
 8 DOJ, and the FBI discussed Binance’s November 21 resolutions. In that conversation, an attorney
 9 with the DOJ’s Computer Crime and Intellectual Property Section stated: “Contrary to probably
 10 what the general public might think, over the last couple of years Binance has been very responsive
 11 to law enforcement. . . . They do have one of the best analysts on their team that knows everything
 12 about North Korean cyber hacks and North Korean money laundering and works [] pretty closely
 13 with the FBI and IRS on some of these cases.”¹⁹

14 This on-the-ground, real-world statement of the U.S. law enforcement community’s
 15 appreciation for the support it receives from Mr. Zhao’s Company stands in stark contrast to the
 16 highly politicized and sensational press statements that accompanied the announcement of Mr.
 17 Zhao’s and the Company’s pleas. Binance’s longstanding commitment to supporting law
 18 enforcement across the globe in bringing bad actors to justice—a commitment founded, and a
 19 system built, at Mr. Zhao’s direction—will continue into the future thanks to his dedicated efforts
 20 during his time at the Company’s helm. Mr. Zhao’s offense conduct in this case has to be viewed
 21 against this broader context of his and Binance’s multi-year, concerted efforts to assist law
 22 enforcement and build the best-in-class compliance program the Company has today.

3. Mr. Zhao's Commitment to the Greater Good

Mr. Zhao has lived his life in service to the greater good. “His dedication to family extends to his broader impact on society, as he treats colleagues and the community with the same care.” Ex. B (C-4), Ltr. from Shaikh A. Almualla, at 2. Letters from family, friends, colleagues, and community members describe how Mr. Zhao’s integrity, compassion, generosity, and “deep sense of accountability” have inspired and positively impacted those around him. *See, e.g.*, Ex. B (A-4), Ltr. from R. Zhao, at 1; Ex. B (B-5), Ltr. from J. Hofbauer, at 2; Ex. B (D-1), Ltr. from S. Austin, at 2; Ex. B (E-30), Ltr. from Y. Xu, at 1.

Despite the distorted image painted by the government and the media, and in stark contrast to many of his counterparts in the crypto and financial services industries, Mr. Zhao is not driven by the meaningless pursuit of riches. He is known by his friends and colleagues to be frugal and humble. *See, e.g.*, Ex. B (D-12), Ltr. from B. Dasgin, at 2 (“[H]e lived by a minimalist philosophy, which inspired me to follow-suit.”). Mr. Zhao “knows nothing about the jewelry, luxury goods, luxury cars, and art auctions that rich people are passionate about,” and he does not own luxury watches or cars (with the exception of a recently purchased Toyota minivan). Ex. B (A-2), Ltr. from Y. He, at 7-8. He prefers to use his resources to support his family and to “add[] something meaningful to the world,” a tenet he learned from his father. PSR ¶ 114. Indeed, in 2021, Mr. Zhao publicly stated that he intends to give away 90% to 99% of his wealth.²⁰

Mr. Zhao is steadfast in his dedication to the broader community and has made significant efforts to give back and assist those in need, both independently and via Binance’s charitable initiatives. Mr. Zhao’s friend, Lily Dash, writes that Mr. Zhao’s “generosity of spirit in those things big and small is significant.” Ex. B (B-3), Ltr. from L. Dash, at 2. Ms. Dash, a native of Barbados, describes Mr. Zhao’s significant contributions to the country and people of Barbados after learning about the high rates of non-communicable diseases in the country:

²⁰ Stan Choe, *Q & A: Binance CEO on Bubbles, Meme Coins and Crypto’s Swings*, ASSOCIATED PRESS (Nov. 17, 2021), available at <https://apnews.com/article/cryptocurrency-technology-business-bitcoin-862d03b59ab714e3230ce85ef8a7cd43>.

1 At the end of 2022[,] when [Mr. Zhao] became aware of the high rates of [non-communicable diseases] in Barbados after visiting the Island and requesting a
 2 briefing, he immediately made a significant multi-year social impact investment to
 3 establish charitable private clinics to provide affordable and accessible medical care
 4 to the less fortunate. This social impact investment has already made a difference
 5 in the lives of a growing number of vulnerable Barbadians and will continue to do
 so into the future as it bridges the gap between government welfare and private
 health care for those who are not well off.

6 Ex. B (B-3), Ltr. from L. Dash, at 2.

7 Recently, Mr. Zhao launched his next charitable endeavor, Giggle Academy: a free
 8 educational platform with the mission to make “basic education accessible, addictive and adaptive,
 9 to the kids who don’t have access to [it] today, all around the world, for free.”²¹ The project aims
 10 to capitalize on Mr. Zhao’s experience and expertise building software platforms to reach hundreds
 11 of millions of children while partnering with education professionals to design and provide content
 12 appropriate for children of all ages.²² This new initiative is further evidence of his lifelong
 13 commitment to helping disadvantaged communities by creating opportunities to learn and grow
 14 without the barriers of traditional systems.²³

15 In addition to Mr. Zhao’s personal philanthropic efforts, Binance, at his direction,
 16 established a dedicated charitable giving arm in 2018. Since its founding, Binance Charity, which
 17 is engaged in extensive charitable efforts globally, has helped more than 3.5 million people in more
 18 than 60 countries by committing more than \$31 million to fund 42 projects.²⁴ See PSR ¶ 115. In
 19 particular, Binance is committed to providing global humanitarian aid to vulnerable populations
 20 and to supporting accessible education and financial literacy—two causes that are deeply
 21 important to Mr. Zhao.

24 ²¹ *Concept Brainstorm*, Giggle Academy (Feb. 2024), available at

25 ²² *Id.*

26 ²³ *Id.*

²⁴ *Impact*, Binance Charity (last visited Apr. 19, 2024), available at <https://www.binance.charity/impact>.

1 ***Humanitarian Aid.*** As evidenced by many of the letters supporting Mr. Zhao, he is
 2 committed to swiftly assisting populations in times of need. *See, e.g.*, Ex. B (D-18), Ltr. from T.
 3 Gambaryan, at 3 (“In times of conflict and natural disasters, [Mr. Zhao] has been a beacon of
 4 support for our employees. His response to the crises in war-affected regions has been nothing
 5 short of extraordinary.”); Ex. B (D-31), Ltr. from V. Krishnamoorthy, at 1 (noting Mr. Zhao’s and
 6 Binance’s impactful donations to causes including COVID-19 aid, Morocco earthquake disaster
 7 relief, and Ukraine emergency relief); Ex. B (D-68), Ltr. from T. Zhou, at 1-2 (“In times of global
 8 crises, [Mr. Zhao] is always the first to send internal messages, launch programs, and encourage
 9 teams to support those in need, reflecting a genuine commitment to giving back to the community
 10 and aiding those in desperate circumstances.”).

11 Under Mr. Zhao’s leadership, Binance Charity has pledged millions of dollars to assist
 12 individuals impacted by natural disasters worldwide, including devastating earthquakes in Turkey
 13 and Morocco, floods in Libya and Italy, and Hurricane Otis in Mexico.²⁵ In France, Binance
 14 Charity has “contributed to the renovation of Notre-Dame [and] supported local communities with
 15 Les Restos Du Coeur.” Ex. B (D-48), Ltr. from D. Princay, at 1. In addition, Binance not only
 16 committed \$10 million in immediate aid to Ukrainian refugees, but also launched initiatives to
 17 provide longer-term financial support to Ukrainian refugees and internally displaced people.²⁶
 18 And during the height of the COVID-19 global pandemic, Mr. Zhao directed Binance to fund
 19 United Nations COVID-19 vaccination efforts and engage in efforts to deliver personal protective
 20 equipment to vulnerable populations in areas hit hardest by the virus.²⁷ *See* PSR ¶ 116. Binance
 21 Charity launched a “Crypto Against COVID campaign that collected the equivalent of \$4 million
 22 in cryptocurrenc[y], which provided assistance to more than 1 million end-beneficiaries in 26

1 countries. Binance Charity gave 100% of the donations to the end-beneficiaries and -
 2 organizations.” Ex. B (D-16), Ltr. from M. Fujimoto, at 6.

3 ***Education Initiatives.*** Mr. Zhao is also passionate about empowering and supporting
 4 underrepresented populations to gain financial literacy and access to blockchain education. Under
 5 Mr. Zhao’s direction, Binance has donated more than \$5.5 million, and raised an additional \$7
 6 million from donors, for various education initiatives via its Web3 Education For All Program,
 7 which is aimed at empowering underrepresented and underprivileged individuals and increasing
 8 financial inclusion.²⁸ See PSR ¶ 116. These initiatives have included scholarships for children in
 9 Africa in a one-year intensive skill training program;²⁹ free training for students, with a focus on
 10 women, in partnership with the Frankfurt School of Finance & Management – Blockchain Center
 11 to support crypto education and job creation in Germany;³⁰ blockchain educational courses for
 12 2,800 women from vulnerable communities across Brazil and Africa;³¹ and \$1 million in donations
 13 to provide at least 1,000 Ukrainians with full scholarships to study in technology-related roles and
 14 secure technical jobs.³² One beneficiary of Mr. Zhao’s and Binance’s educational initiatives writes
 15 that “[Mr. Zhao’s] commitment to education is not confined to [her] story alone. His efforts extend

1 globally, sustaining schools in Africa and providing countless individuals with the chance to build
 2 a better future. This dedication speaks volumes about his character and the values he upholds.”
 3 Ex. B (F-4), Ltr. from S. Goncalves da Silva, at 1-2.

4 Mr. Zhao also directed Binance to create initiatives that support greater access to education
 5 for underprivileged children more broadly. For example, Binance’s Lunch for Children program
 6 has provided nutritious meals to thousands of children across Africa.³³ In addition, the Binance
 7 for Children program has donated textbooks and school materials for children in Uganda whose
 8 parents cannot afford them, along with providing electricity with clean and safe solar energy to
 9 vulnerable communities.³⁴

10 As evidenced by these endeavors and the more than 160 letters submitted in his support
 11 (including one letter co-signed by more than 50 people, Ex. B (D-28), Ltr. from K. Khomiakov),
 12 Mr. Zhao cares deeply for his loved ones and community members alike. As his friend, Anndy
 13 Lian, writes, Mr. Zhao’s “unwavering commitment to making a tangible difference in communities
 14 globally has been a source of inspiration and motivation.” Ex. B (E-15), Ltr. from A. Lian, at 1.
 15 In that spirit, Mr. Zhao remains committed to serving as a force for good for the community.

16 In looking forward to the future, Mr. Zhao is committed to ongoing charitable work. He
 17 has particularly “taken up active interests in learning to apply his technology insights and computer
 18 science knowhow to help drive progress in biotechnology[.]” Ex. B (B-9), Ltr. from J. and T. Tsai,
 19 at 2. To him, crypto and biotech carry a similar promise, one that has long appealed to his
 20 character: the potential to make expensive, exclusive, life-changing technology available to the
 21 broader population. Ex. A, C. Zhao Ltr. to Court, at 2. Mr. Zhao is interested in exploring ways
 22 that he can leverage his skills and resources to promote research and increase access to clinical
 23

1 trials for complex diseases. Ex. A, C. Zhao Ltr. to Court, at 2. Mr. Zhao is also interested in
 2 helping biotech companies to develop cures for devastating diseases that are not sufficiently
 3 widespread for larger biopharmaceutical companies to address. Ex. A, C. Zhao Ltr. to Court, at 2.
 4 As a friend and former colleague writes, Mr. Zhao “will seek to create value in other fields,”
 5 including the biomedical industry, as Mr. Zhao “strongly believes that with the current
 6 technologies, humans should continually improve on coming up with even better solutions to more
 7 illnesses and diseases, so more people could have the opportunity to enjoy a better quality of life.”
 8 Ex. B (B-12), Ltr. from A. Yan, at 3.

9 **D. Mr. Zhao Has Shown Extraordinary Acceptance of Responsibility**

10 Mr. Zhao has exhibited what the Probation Office described as “remarkable” and
 11 “exceptional” acceptance of responsibility. PSR ¶¶ 55, 156. As described earlier, in addition to
 12 appearing voluntarily from a non-extradition country to plead guilty to a criminal charge, Mr. Zhao
 13 and the Company entered into a multi-agency resolution, pursuant to which Mr. Zhao and the
 14 Company agreed to pay an unprecedented fine of more than \$4.3 billion, plus his personal fine of
 15 \$150 million to the CFTC. And he has stepped down as CEO of the company that he built from
 16 the ground up. Mr. Zhao understands the gravity of his offense, regrets the choices he made, and
 17 wishes to move on to the next chapter of life, which includes philanthropic efforts and caring for
 18 his partner and young children, which he has not been able to do since arriving in the United States
 19 to plead guilty in November 2023. As noted by his friend, Ms. Dash, Mr. Zhao’s “absence has
 20 and would immeasurably affect the lives of his family, especially his very young children in Abu
 21 Dhabi, who still very much need him[,] and his [82-year-old] mother who relies on him.” Ex. B
 22 (B-3), Ltr. from L. Dash, at 2-3.

23 Those close to Mr. Zhao attest to his acknowledgment of his mistakes, as well as the
 24 “personal growth and remorse he has shown, especially in the face of adversity and under the
 25 scrutiny of his own family.” Ex. B (B-4), Ltr. from R. Gu, at 3; *see also* Ex. B (C-1), Ltr. from
 26 Amb. M. Baucus, at 1 (noting that Mr. Zhao is “one of the most decent persons I have known” and

1 is “very contrite and assumed full responsibility”). Mr. Zhao has recognized how his “poor
 2 decisions” and “choices” led him to this moment in his life, and the tremendous impact those
 3 decisions and choices had on his family, friends, employees, and the cryptocurrency community.
 4 Ex. A, Ltr. from C. Zhao, at 1, 2. But those same decisions and choices have encouraged Mr. Zhao
 5 to reflect on how he can positively affect the lives of others moving forward. Ex. A, Ltr. from C.
 6 Zhao, at 1, 2. In Mr. Zhao’s words, this “will be [his] only encounter with the criminal justice
 7 system and . . . going forward [he] will live [his] life in a manner that will make everyone proud.”
 8 Ex. A, Ltr. from C. Zhao, at 2. Mr. Zhao respectfully submits that an appropriate sentence should
 9 reflect his character, his “remarkable” acceptance of responsibility, and his many contributions to
 10 his family, friends, and community.

11 **E. Precedent and the Need to Avoid Sentencing Disparities Warrant Probation**

12 The Court must impose a sentence that “avoid[s] unwarranted sentence disparities among
 13 defendants with similar records who have been found guilty of similar conduct.” 18 U.S.C.
 14 § 3553(a)(6). This factor strongly favors probation, as there are *no* similar defendants who have
 15 been sentenced to a term of imprisonment. With appreciation for the Probation Office’s diligent
 16 work in this case, the PSR does not fully address this critical factor.

17 By far, the most common outcome for a defendant convicted of a BSA or similar violation
 18 is a sentence of probation or time served. That is true in this District, *see, e.g., U.S. v. Alshafei*,
 19 No. 15-cr-34-RAJ (W.D. Wash. 2015) (defendant, facing a Guideline range of 15-21 months,
 20 sentenced to time served for operating unlicensed money transmitting business), and nationally,
 21 *see, e.g., U.S. v. Koo*, No. 23-cr-00568 (C.D. Cal. 2024) (manager of investment firm sentenced to
 22 probation for failure to maintain an AML program, including admitting to failing to file currency
 23 transaction reports (“CTRs”)); *U.S. v. Cohen*, No. 22-cr-265 (E.D. Pa. 2024) (owner of check-
 24 cashing business sentenced to probation for failure to maintain an effective AML program,
 25 conspiracy to file, and filing, false CTRs); *U.S. v. Ofer*, No. 21-cr-00174 (E.D.N.Y. 2023) (banker
 26 sentenced to probation for failure to maintain effective AML program); *U.S. v. Gonzalez*, No. 21-

cr-1319 (S.D. Cal. 2022) (owner of currency exchange business that facilitated illegal cash transactions, including narcotics trafficking proceeds, sentenced to probation for failure to maintain an AML program, failure to disclose offices in Mexico, and filing false or materially misleading registrations and reports); *U.S. v. Fitch*, No. 16-cr-00123 (S.D. Cal. 2016) (money transmitter sentenced to probation for failure to maintain effective AML program); *U.S. v. Miller*, No. 13-cr-445 (E.D. Pa. 2014) (CEO of domestic financial institution sentenced to probation for failure to maintain an effective AML program and failure to file suspicious activity reports).³⁵

The case most similar to this one is the recent BitMEX prosecution. *See U.S. v. Hayes, et al.*, No. 20-cr-500 (S.D.N.Y. 2020). There, three co-founders of a global crypto exchange (the CEO, Chief Operating Officer (“COO”), and Chief Technology Officer (“CTO”)) each pleaded guilty, like Mr. Zhao, to a single count of causing their platform to fail to implement an effective AML program under the BSA. As in its case against Binance, the government in *BitMEX* cited (i) a similar duration for the platform’s violative conduct (five years); and (ii) billions of dollars in transaction volumes.³⁶ Also like here, the government portrayed the conduct in stark and egregious terms, describing BitMEX as “in effect a money laundering platform” and “a vehicle for sanctions violations.”³⁷ The government also made more serious allegations not found here, including that the CEO and COO had personally “communicated directly with BitMEX customers who self-identified as being based in Iran.”³⁸

³⁵ The same can hold true for defendants in this District convicted of more serious crimes with higher Guideline ranges. *See, e.g., U.S. v. Lu*, No. 13-cr-15-RAJ (W.D. Wash. 2013) (sentencing defendant, convicted of wire fraud and facing a Guideline range of 15-21 months, to time served (satisfied by the surrender date) and supervised release); *U.S. v. Ulmer*, No. 15-cr-53-RAJ (W.D. Wash. 2015) (sentencing defendant convicted of bank fraud and facing a Guideline range of 12-18 months to time served (satisfied by the surrender date) and supervised release); *U.S. v. Shepard*, No. 18-cr-147-RAJ (W.D. Wash. 2018) (sentencing defendant, convicted of narcotic offenses, to time served (satisfied by the four days defendant was detained in between his arrest and detention hearing) and supervised release).

³⁶ *See Founders Of Cryptocurrency Exchange Plead Guilty To Bank Secrecy Act Violations*, DOJ Press Release (Feb. 24, 2022), available at <https://www.justice.gov/usao-sdny/pr/founders-cryptocurrency-exchange-plead-guilty-bank-secrecy-act-violations>; *U.S. v. Hayes*, No. 20-cr-500 (S.D.N.Y. 2020), Dkt. 2.

³⁷ *U.S. v. Hayes*, No. 20-cr-500 (S.D.N.Y. 2020), Dkt. 2 at ¶ 24.

³⁸ *Id.*

1 Even so, all three BitMEX founders were sentenced to probation. The BitMEX COO was
 2 sentenced to 30 months of probation and was allowed to travel and reside internationally both
 3 before and after his plea and sentencing.³⁹ The CTO, a U.S. citizen, was sentenced to 18 months
 4 of probation.⁴⁰ The CEO, who had a Guideline range of 6 to 12 months of imprisonment, was
 5 sentenced to two years of probation, with six months of home detention.⁴¹ The BitMEX CEO was
 6 a U.S. citizen who was allowed to travel internationally on bail before sentencing,⁴² whereas Mr.
 7 Zhao has been required to surrender his passports and remain in the United States away from home
 8 for five and a half months while awaiting sentencing. Notably, the BitMEX CEO faced arguments
 9 by the government that his sentence should reflect uncharged conduct covered in his plea
 10 agreement involving allegations of a series of false statements intended to mislead a bank over a
 11 multi-year period.⁴³ None of those factors exist here.

12 Furthermore, the BitMEX defendants were indicted and pleaded guilty only after 17
 13 months of intense pre-trial litigation,⁴⁴ whereas Mr. Zhao pleaded guilty to an information,
 14 remediated, directed his Company to enter into a multi-agency resolution, and took numerous other
 15 steps to ensure compliance and cooperation. Given Mr. Zhao's extraordinary acceptance of
 16 responsibility, he should not be treated more harshly than the BitMEX founders; like them, he
 17 should receive probation.

18 In fact, even defendants with substantially *higher* Guideline ranges than Mr. Zhao have
 19 received sentences of probation for this type of BSA violation. For instance, in *U.S. v. Panzera*,
 20 No. 11-cr-591 (E.D.N.Y. 2014), the owner of a company involved in a fraudulent check-cashing
 21 scheme pleaded guilty—more than a year after indictment—both to failing to maintain an effective
 22

24 ⁴⁰ See *U.S. v. Reed*, No. 20-cr-500 (S.D.N.Y. 2022), Dkt. 383.

25 ⁴¹ See *Hayes*, No. 20-cr-500, Dkt. 342, at 53; Dkt. 344.

25 ⁴² See *id.* at Dkt. 47.

26 ⁴³ See *id.* at Dkt. 334, at 6-7 and 12.

⁴⁴ See, e.g., *id.* at Dkt. 1; Minute Entry for Feb. 24, 2022.

1 AML program and to conspiracy to defraud the United States under 18 U.S.C. § 371. His
 2 Guideline range was 24 to 30 months of imprisonment. Even with this higher Guideline range,
 3 plus the conspiracy offense that does not exist here, and the absence of unhesitating acceptance of
 4 responsibility like Mr. Zhao has shown, the court sentenced the defendant to three years of
 5 probation.⁴⁵

6 Indeed, counsel is not aware of a single instance in which a first-time offender [REDACTED]
 7 [REDACTED] who pleaded guilty to 31 U.S.C. §§ 5318(h) and 5322, and also did not engage in
 8 fraud, was sentenced to incarceration. To counsel's knowledge, there are only three cases—
 9 nationwide, ever—in which defendants convicted of this BSA offense were sentenced to prison.
 10 Each case is readily distinguished. *First*, in *U.S. v. Randol*, No. 23-cr-440 (C.D. Cal. 2024), the
 11 owner of a cryptocurrency-cash exchange business pleaded guilty to failing to maintain an
 12 effective AML program by “allowing his . . . company to help scammers and drug traffickers
 13 launder millions of dollars in criminal proceeds through his business.”⁴⁶ The defendant
 14 “maintained a company website that falsely claimed his business was ‘a fully compliant . . . money
 15 services business’ that was registered with [FinCEN],” personally met with “anonymous
 16 customers in-person to complete transactions,” “conducted hundreds of Bitcoin-for-cash
 17 transactions after receiving large cash shipments in the mail from anonymous individuals,” and
 18 “t[ook] steps to conceal [unlawful transactions] from law enforcement.”⁴⁷ The defendant also had
 19 a prior drug-related conviction and a long history of opioid abuse.⁴⁸ Facing a Guideline range of
 20 6 to 12 months, the defendant was sentenced to four months of imprisonment. Plainly, the
 21 significant aggravating facts in *Randol* are *not* present in Mr. Zhao's case. [REDACTED]
 22 [REDACTED]

23
 24 ⁴⁵ *U.S. v. Panzera*, No. 11-cr-591 (E.D.N.Y. 2014), Dkts. 21, 56, 100, 106.

25 ⁴⁶ *Bitcoin-for-Cash Exchange Business Owner Agrees to Plead Guilty to Failing to Maintain an Effective Anti-*
Money Laundering Program, DOJ Press Release (Sept. 5, 2023), available at [https://www.justice.gov/usao-](https://www.justice.gov/usao-cdca/pr/bitcoin-cash-exchange-business-owner-agrees-plead-guilty-failing-maintain-effective)
[cdca/pr/bitcoin-cash-exchange-business-owner-agrees-plead-guilty-failing-maintain-effective](https://www.justice.gov/usao-cdca/pr/bitcoin-cash-exchange-business-owner-agrees-plead-guilty-failing-maintain-effective).

26 ⁴⁷ *Id.*

⁴⁸ *U. S. v. Randol*, No. 23-cr-440 (C.D. Cal. 2024), Dkt. 50, at 6, 12-14.

1 *Second*, in *U.S. v. G & A Check Cashing et al.*, No. 12-cr-560 (C.D. Cal. 2013), the manager
 2 and designated AML compliance officer of a check cashing store were indicted and, months later,
 3 pleaded guilty to BSA violations involving their personal, deliberate failure to file CTRs.⁴⁹ The
 4 government described the manager as the “leader of a check-cashing conspiracy” who directly
 5 “facilitated health care fraud and likely other crimes by providing untraceable cash to criminals to
 6 fund their criminal schemes, hide profits, and avoid detection by law enforcement.”⁵⁰ “Additional
 7 aggravating factors include [the manager’s] lies to federal agents . . . , conviction for driving under
 8 the influence with a blood alcohol level twice the legal limit, [and] arrest for possession of 57
 9 marijuana plants at his residence along with scales and packaging materials.”⁵¹ The manager also
 10 had “no history of legitimate employment,” and he “was on probation from [a prior conviction]
 11 while he committed the instant offense.”⁵² The manager’s effective Guideline range was 60
 12 months for two charges—the BSA violation and one count of conspiracy to commit reporting
 13 failures—and the court imposed a sentence of 60 months’ imprisonment. As for the designated
 14 AML compliance officer, he not only was “aware of [unlawful] transactions, he at times
 15 participated in them.”⁵³ The AML officer also had “an extensive criminal history” and “at the
 16 time [he] committed the instant offense, he was on probation resulting from a previous
 17 conviction.”⁵⁴ The AML officer’s Guideline range was 10 to 16 months, and he was sentenced to
 18 8 months of imprisonment. These facts and circumstances bear no resemblance to Mr. Zhao’s
 19 case.

22 ⁴⁹ *Los Angeles Check Cashing Store, Its Head Manager and Compliance Officer Sentenced for Violating Anti-money*
 23 *Laundering Laws*, DOJ Press Release (Jan. 14, 2013), available at <https://www.justice.gov/opa/pr/los-angeles-check-cashing-store-its-head-manager-and-compliance-officer-sentenced-violating>.

24 ⁵⁰ *U.S. v. G & A Check Cashing et al.*, No. 12-cr-560 (C.D. Cal. 2013), Dkt. 83, at 1.

25 ⁵¹ *Id.*

26 ⁵² *Id.* at 22-23.

⁵³ *Id.*, Dkt. 85, at 1.

⁵⁴ *Id.* at 5.

1 *Third*, in *U.S. v. Ali*, No. 17-cr-224 (N.D. Tex. 2017), the operator of a check-cashing
 2 business was indicted on 31 counts of bank fraud, conspiracy, embezzlement, aggravated identity
 3 theft, and failing to maintain an effective AML program, and pleaded guilty to the AML charge.
 4 The defendant personally negotiated and cashed 3,423 U.S. Treasury checks totaling \$16.6 million,
 5 the majority of which were “obtained through fraud, either because the checks were based on
 6 fraudulent federal tax returns or because the checks had been stolen.”⁵⁵ He also “drastically
 7 minimized his role in the offense,” rather than accept responsibility fully, as Mr. Zhao has done.⁵⁶
 8 Mr. Ali was sentenced to 13 months of imprisonment.

9 Unlike the defendants in *Randol*, *Ali*, and *G & A Check Cashing*, Mr. Zhao did not
 10 participate in fraud or unlawful transactions. He is not a recidivist; indeed, he has no criminal
 11 history whatsoever. He did not lie to federal agents or obstruct justice. He was not a designated
 12 compliance officer with expertise in U.S. AML and BSA requirements. He did not minimize his
 13 offense conduct. Instead, he is a first-time offender who built a Company of enormous social
 14 utility. He led Binance to become a regulated crypto exchange in a number of jurisdictions. He
 15 pleaded guilty. [REDACTED]
 16 He is a committed, loving parent with a lifelong record of charity, community engagement, and
 17 contributions to the greater good. *Randol*, *Ali*, and *G & A Check Cashing* thus are *not* apt
 18 precedents for sentencing Mr. Zhao because the defendants in those cases were not remotely
 19 similarly situated to Mr. Zhao.

20 In fact, most often, individual criminal charges are not even filed at all for a BSA violation
 21 like Mr. Zhao’s. When U.S. financial institutions such as JPMorgan Chase,⁵⁷ Western Union,⁵⁸

25 ⁵⁶ *U.S. v. Ali*, No. 17-cr-224 (N.D. Tex. Apr. 19, 2017), Sentencing Tr. at 4.

26 ⁵⁷ Deferred Prosecution Agreement, Ex. C, *U. S. v. JPMorgan Chase Bank, N.A.*, (S.D.N.Y. 2014), available at
[https://www.justice.gov/sites/default/files/usao-sdny/legacy/2015/03/25/JPMC%20DPA%20Packet%20\(Fully%20Executed%20w%20Exhibits\).pdf](https://www.justice.gov/sites/default/files/usao-sdny/legacy/2015/03/25/JPMC%20DPA%20Packet%20(Fully%20Executed%20w%20Exhibits).pdf).

⁵⁸ *U.S. v. The Western Union Co.*, No. 17-cr-11 (M.D. Pa. 2017), Dkt. 3.

1 and MoneyGram⁵⁹ resolved BSA charges in recent years, they did so through corporate deferred
 2 prosecution agreements (“DPAs”), and no individuals—let alone any CEOs—faced charges at all,
 3 despite details in the DPAs of individual misconduct in each of those cases. For instance, in the
 4 JPMorgan Chase matter, the government filed and deferred criminal charges relating to the bank’s
 5 conduct in regard to Bernard Madoff’s Ponzi scheme, and required the bank “to pay a \$1.7 billion
 6 penalty to the victims of the Madoff fraud.”⁶⁰ That is, unlike here, there were actual, identifiable
 7 victims of fraud. No officers, executives, or employees of the bank were prosecuted, even though
 8 the government stated that a senior executive, for example, “was told by a senior colleague that
 9 there is a ‘well-known cloud over the head of Madoff and that his returns are speculated to be part
 10 of a Ponzi scheme.’” *Id.* And, as the government noted, “while certain senior compliance officers
 11 in the United States were provided with all of the relevant facts[,] . . . the U.S. compliance officers
 12 did very little to investigate those suspicions, failed to raise these concerns with the bank’s anti-
 13 money laundering department, and failed to file a [Suspicious Activity Report (“SAR”).” *Id.* The
 14 government did not charge any individual with a crime.

15 Notably, in its own sentencing submission against Binance on February 16, 2024, the
 16 government cited as comparable to Binance four major prosecutions of “large financial
 17 institutions” where “the criminal conduct of those defendants threatened the integrity of the U.S.
 18 financial system”: BNP Paribas (“BNPP”) (2015); Rabobank (2018); UniCredit Bank (2019); and
 19 Danske Bank (2022).⁶¹ All involved more egregious offenses not found in Mr. Zhao’s case, such
 20 as defrauding the United States and violating the Trading with the Enemy Act (“TWEA”). And
 21 yet, the government did not bring criminal charges against a single individual in any of these four
 22 cases that the government itself has cited as comparable.

23 _____

Multi-Billion Dollar Ponzi Scheme, DOJ Press Release (Jan. 7, 2014) available at <https://www.justice.gov/usao-sdny/pr/manhattan-us-attorney-and-fbi-assistant-director-charge-announce-filing-criminal>.

⁶¹ *Binance*, No. 23-cr-178, Dkt. 32 at 10.

1 In the BNPP case, the world’s fourth largest bank paid \$8.9 billion and pleaded guilty to
 2 conspiring to violate the International Emergency Economic Powers Act (“IEEPA”) and TWEA
 3 by processing billions of dollars of transactions through the U.S. financial system on behalf of
 4 Sudanese, Iranian, and Cuban entities subject to U.S. economic sanctions.⁶² The bank did not
 5 simply fail to maintain an effective AML program; the government stated that it “went to elaborate
 6 lengths to conceal prohibited transactions, cover its tracks, and deceive U.S. authorities.” The
 7 resolution documents also referenced culpable officers and executives. For example, the
 8 government noted that “a senior compliance officer at BNPP wrote to other high-level BNPP
 9 compliance and legal employees reminding them that certain Sudanese banks with which BNPP
 10 dealt ‘play a pivotal part in the support of the Sudanese government which . . . has hosted Osama
 11 Bin Laden and refuses the United Nations intervention in Darfur.’”⁶³ And yet, again, no individual
 12 charges were filed in this case.

13 Similarly, in the Rabobank case, the bank pleaded guilty to conspiring with “several former
 14 executives” to impair, impede, and obstruct its primary regulator, the Office of the Comptroller of
 15 the Currency (“OCC”), by concealing deficiencies in its AML program and by obstructing the
 16 OCC’s examination of Rabobank.⁶⁴ Again, there were statements by the government about high-
 17 level individual culpability in the case: “Rabobank executives actively sought to hide and minimize
 18 the deficiencies in its AML program in an effort to deceive the regulators as to its true state in
 19 hopes of avoiding regulatory sanctions that had previously been imposed on Rabobank in 2006
 20 and 2008 for nearly identical failures.”⁶⁵ And yet, despite the involvement of executives in

⁶⁵ *Id.*

1 obstructive conduct, only a single Rabobank Vice President received a DPA; he was not made to
2 plead guilty, and no one else was charged.⁶⁶

3 In the UniCredit Bank case, the bank pleaded guilty to conspiring to violate IEEPA and
4 defraud the United States by processing hundreds of millions of dollars of transactions through the
5 U.S. financial system on behalf of an entity designated as a weapons of mass destruction
6 proliferator and other Iranian entities subject to U.S. economic sanctions.⁶⁷ Unlike Binance, this
7 case did not involve automated systems that randomly matched U.S. users with users in sanctioned
8 countries. According to the government, UniCredit “knowingly and willfully moved at least \$393
9 million through the U.S. financial system on behalf of sanctioned entities . . . through a scheme,
10 formalized in its own bank policies and designed to conceal from U.S. regulators and banks the
11 involvement of sanctioned entities in certain transactions.”⁶⁸ Although UniCredit pleaded guilty
12 to a conspiracy, no individuals were charged.

13 Finally, Danske Bank paid \$2 billion and pleaded guilty to conspiracy to commit bank
14 fraud in connection with lies about its AML controls.⁶⁹ The government highlighted that the bank
15 “funnel[ed] billions of dollars in suspicious and criminal transactions through the United States,”
16 and bank “employees conspired with . . . customers to shield the true nature of their transactions,
17 including by using shell companies that obscured actual ownership of the funds.”⁷⁰ The plea
18 agreement indicates that at least two high-level compliance officers, and several executives, were
19 aware of and failed to stop the criminal conduct, and that several other employees knowingly made
20 false statements in furtherance of the conspiracy; in fact, the plea agreement is replete with
21

⁷⁰ *Id.*

1 specific, stipulated facts about culpable individual conduct.⁷¹ Yet again, despite the conspiracy
 2 charge and the culpability of identifiable employees, no individuals were prosecuted.

3 The government almost certainly will try to portray the present case to the Court in
 4 hyperbolic terms as the worst exemplar of these types of violations. It is not. The cases above
 5 variously involved comparable and even larger fines; billions of dollars in transactions involving
 6 sanctioned countries and a weapons of mass destruction proliferator; active concealment; and
 7 measurable harm—\$1.7 billion—to actual, identifiable victims of the Madoff fraud. Yet not a
 8 single person was charged, much less sentenced to prison, in any of those cases. The fact that Mr.
 9 Zhao’s case relates to the cryptocurrency industry in general, or Binance in particular, is not a valid
 10 basis for differential treatment.

11 The reality is that Mr. Zhao has chosen to accept responsibility for an offense which rarely
 12 leads to any criminal charges at all, let alone against the CEO of a financial institution. The few
 13 similar cases that have been charged have resulted, overwhelmingly, in sentences of probation.
 14 And the scant handful of defendants who have been sentenced to prison in cases involving BSA
 15 violations have had criminal histories and aggravating facts not remotely present here.

16 The government is, of course, free to exercise its prosecutorial discretion. But it is *not* free
 17 to ignore the prohibition on unwarranted sentencing disparities. To sentence Mr. Zhao to a term
 18 of imprisonment would be a significant departure from precedent—one that is unwarranted in this
 19 case; is inconsistent with his lack of criminal history, complete acceptance of responsibility, [REDACTED]
 20 [REDACTED]; and cannot be justified by any recidivism, additional charges, or other aggravating
 21 circumstances. As in every similar case, the appropriate sentence here is probation.

22 **F. Mr. Zhao’s Sentence Should Account for the Harsher Conditions He Would**
 23 **Face, as a Noncitizen, If Incarcerated**

24 The sentence imposed here also should take into account that Mr. Zhao, who is not a U.S.
 25 citizen, will unfairly face harsher realities if imprisoned than a similarly-situated citizen.

26 ⁷¹ Plea Agreement, Attachment A - Statement of Facts (Dec. 13, 2021), available at <https://www.justice.gov/opa/pr/danske-bank-pleads-guilty-fraud-us-banks-multi-billion-dollar-scheme-access-us-financial>.

1 Probation’s recommendation that Mr. Zhao serve five months with no period of supervised release
 2 takes into account that, at the conclusion of any term of imprisonment, Mr. Zhao would enter
 3 removal proceedings at an ICE facility, effectively resulting in secondary detention for an
 4 unknown period of time. *See* Sentencing Recommendation, at 7; *see also* Ex. C, Decl. of J. Sickler,
 5 at ¶¶ 24, 26-30; U.S.S.G. § 5D1.1. This is an appropriate and important consideration.

6 A critical additional factor, which Probation’s recommendation does not reflect, is that Mr.
 7 Zhao will face harsher and more dangerous conditions during any term of incarceration than a U.S.
 8 citizen, solely on account of his status as a noncitizen. Pursuant to BOP policy, as a noncitizen
 9 Mr. Zhao is ineligible for a minimum-security facility—where a similarly-situated U.S. citizen
 10 would be designated—and instead must be housed in at least a low-security facility. *See* Ex. C,
 11 Decl. of J. Sickler, at ¶¶ 7-11, 22. The confinement conditions are appreciably more restrictive,
 12 there are fewer work and program opportunities, and the inmate population as a whole is more
 13 dangerous in low-security facilities than in minimum-security facilities. *See* Ex. C, Decl. of J.
 14 Sickler, at ¶¶ 13-18.

15 The Court’s sentence should account for all of these realities. In sentencing, courts must
 16 consider an “increased severity in the conditions of confinement [that] result[s] from alien status.”
 17 *U.S. v. Lopez-Salas*, 266 F.3d 842, 849 (8th Cir. 2001) (citing *U.S. v. Davoudi*, 172 F.3d 1130,
 18 1134 (9th Cir. 1999)). The then-Chief Judge of the SDNY recognized this inequity just a few
 19 years ago in determining what sentence to impose for a defendant’s fraud conviction:

20 If I could sentence Mr. Black to a term of incarceration—a brief term of
 21 incarceration—knowing that he would go to a facility appropriate to his criminal
 22 conduct, I would do it. But I know that I can’t. I know that simply because he is a
 23 non-citizen . . . he will not be eligible to serve his sentence in the same way that
 24 any American citizen who stood convicted of this crime would serve. . . . And for
 25 reasons that are incomprehensible to me, were I to sentence him to a short term of
 26 imprisonment—which would be served in a private facility and not at some place
 like FCI Allenwood, . . . at the end of that term he could not walk out the door and
 be picked up . . . and taken to the airport. He would be treated like an illegal alien,
 and he would be released into the custody of ICE, and at some point long after my
 intended sentence had expired he would be deported. And that’s not right.

1 *U.S. v. Connolly, et al.*, No. 16-cr-370 (S.D.N.Y. 2019), Dkt. 451, at 91. Despite a Guideline range
 2 of 57 to 71 months' imprisonment, the court sentenced Mr. Black to "time served, plus three years
 3 of supervision, to include a term of nine months' home confinement to be served in the United
 4 Kingdom." *U.S. v. Connolly et al.*, No. 16-cr-370 (S.D.N.Y. 2019), Dkt. 451, at 95.

5 Similarly, in *U.S. v. Cohen*, the court sentenced the defendant, a French citizen convicted
 6 of insider trading, to time served and one year of supervised release despite a Guideline range of
 7 30-37 months' imprisonment. No. 19-cr-741 (S.D.N.Y. 2020), Dkt. 48, at 29, 44. In so doing, the
 8 court took into account the harsh consequences that the defendant would face as a noncitizen if
 9 incarcerated: the defendant would be "unable to serve terms of imprisonment in a camp or
 10 minimum-security facility. And when foreign nationals complete a term of imprisonment, they
 11 are transferred to ICE detention where they can wait for an indefinite period to be returned to their
 12 home country." *U.S. v. Cohen*, No. 19-cr-741 (S.D.N.Y. 2020), Dkt. 48, at 42. Numerous other
 13 courts have similarly granted downward variances because of the unjustly harsh reality that
 14 incarceration would impose based on defendants' citizenship status. *See, e.g., U.S. v. Walchli*, No.
 15 20-cr-000497 (S.D.N.Y. 2024), Dkt. 110, 111 (non-U.S. citizen who voluntarily traveled to the
 16 United States to plead guilty, and who faced a Guideline range of 18-24 months, sentenced to time
 17 served); *U.S. v. Lewis*, No. 23-cr-370 (S.D.N.Y. 2024), Dkt. 66, 67, 69 (sentencing defendant, a
 18 non-U.S. citizen convicted of securities fraud and who faced a Guideline Range of 18-24 months,
 19 to three years' probation, to be served at home abroad); *U.S. v. Bakeas*, 987 F. Supp. 44, 48-49 (D.
 20 Mass. 1997); *U.S. v. Simalavong*, 924 F. Supp. 610, 611 (D. Vt. 1995); *U.S. v. Ferreria*, 239 F.
 21 Supp. 2d 849, 849-50 (E.D. Wis. 2002).⁷²

22 Like the defendants in those cases, if incarcerated, Mr. Zhao would necessarily face a
 23 harsher punishment than similarly-situated defendants solely by virtue of his citizenship status.

24
 25 ⁷² *See also* Francesca Brody, *Extracting Compassion from Confusion: Sentencing Noncitizens After U.S. v. Booker*,
 26 79 FORDHAM L. REV. 2129, 2171-72 (2011) ("when a defendant can show that deportation, lack of access to prison
 benefits, and prolonged immigration detention will increase the severity of his sentence, § 3553 requires offsetting
 those factors to avoid violating the parsimony principal" that demands every sentence be "sufficient, but not greater
 than necessary," to accomplish the goals of punishment").

As noted above, pursuant to BOP policies, as a noncitizen Mr. Zhao is ineligible for minimum-security facilities and instead must be housed in at least a low-security facility. *See* Ex. C, Decl. of J. Sickler, at ¶ 11. In the Seattle area, this likely means confinement in the Federal Detention Center—SeaTac (“SeaTac”), which has recently struggled with significant staffing and other concerns, including violence against inmates. *See* Ex. D, Decl. of R. Palmquist, at ¶¶ 8, 11-12. Recent reporting describes SeaTac as “severely short-staffed,” with a vacancy rate for correctional officers of approximately 50%.⁷³ SeaTac is categorized as an “administrative facility” by the BOP, which are institutions for special missions, including “containment of extremely dangerous, violent, or escape-prone inmates,” unlike minimum-security facilities which generally house non-violent, first-time offenders. *See* Ex. C, Decl. of J. Sickler, at ¶ 21. And notably, the ICE detention facility in Washington where Mr. Zhao would most likely be held following a period of incarceration at SeaTac has recently been the subject of extensive reporting for its history of human rights violations, allegations of neglect, reports of sexual assault and abuse, and setting of national records for placement of inmates into solitary confinement. *See* Ex. C, Decl. of J. Sickler, at ¶ 29. Similarly situated defendants who are U.S. citizens would not face these conditions.⁷⁴

The likelihood that Mr. Zhao would face personal harm or other threats in these volatile environments is amplified once his personal characteristics are taken into account. His high public profile and instant recognizability as a wealthy entrepreneur may make him a target for threats, intimidation, and extortion. *See* Ex. D, Decl. of R. Palmquist at ¶¶ 13-18. [REDACTED]

[REDACTED] Mr. Zhao “should not be disparately treated simply because he

⁷³ *SeaTac federal jail struggles with 50% vacancy rate for key positions*, THE SEATTLE TIMES (Jan. 2, 2024), available at <https://www.seattletimes.com/seattle-news/seatac-federal-jail-struggles-with-50-vacancy-rate-for-key-positions/>.

⁷⁴ In addition, as a noncitizen, Mr. Zhao is unlikely to be able to receive the benefits of a “split sentence” (i.e., a term of imprisonment followed by supervised release) because BOP likely will be required to transfer custody of Mr. Zhao to ICE at the completion of his term of imprisonment. Accordingly, as Probation recognized, instead of serving the second half of a “split sentence” under supervised release, he would remain detained at an ICE facility awaiting removal proceedings. Sentencing Recommendation, at 7; *see also* Ex. C, Decl. of J. Sickler, at ¶ 24.

1 is a noncitizen,” when “[h]e is, in every way, the opposite of an offender who resided in the United
 2 States illegally, who committed a violent offense, who also had prior offenses—who would be
 3 considered a dangerous flight risk.” Ex. C, Decl. of J. Sickler, at ¶ 33.

4 As reflected in the cases discussed above, courts have avoided these unwarranted
 5 disparities by imposing sentences of time served or probation that allowed defendants to return to
 6 their home countries. *See, e.g., U.S. v. Robson, et al.*, No. 14-cr-272 (S.D.N.Y. 2014) (permitting
 7 defendants Robson, Yagami, and Stewart—all foreign citizens convicted of conspiracy to commit
 8 wire and bank fraud—to serve their sentences of supervised release abroad, at home in the U.K.
 9 and Hong Kong); *U.S. v. Liew*, No. 17-cr-01 (N.D. Ill. 2021) (sentencing defendant, a Singaporean
 10 citizen convicted of conspiracy to commit wire fraud who faced a Guideline range of 12-18 months
 11 , to time served (satisfied by his surrender date) and permitting him to return home). In some cases
 12 involving fraud convictions, courts have imposed an additional requirement that a defendant serve
 13 home confinement for a period of time in his home country. *See Connolly*, No. 16-cr-370
 14 (S.D.N.Y. 2019), Dkt. 451, at 95 (sentence of time served, plus three years of supervision including
 15 nine months of home confinement to be served in the U.K.); *U.S. v. Sarao*, No. 15-cr-75 (N.D. Ill.
 16 2015), Dkt. 121 (sentence of one year of supervised release with a condition of home confinement
 17 in the U.K.). For Mr. Zhao’s offense—failure to implement a BSA-compliant AML program—
 18 no relevant case has ever resulted in incarceration in the first place. *See* Section IV.E. Based on
 19 all the facts and circumstances here, a term of probation that allows Mr. Zhao to return home is
 20 the only necessary or appropriate sentence.

21 Of the relevant cases, all of which resulted in time served or probation, only Mr. Hayes of
 22 BitMEX received a sentence of probation that included home confinement, for a period of six
 23 months which Mr. Hayes (a U.S. citizen) served in the United States. *See U.S. v. Hayes*, No. 20-
 24 cr-500 (S.D.N.Y. 2022), Dkt. 342, Dkt. 344. As discussed above, Mr. Hayes’s sentencing
 25 presented aggravating circumstances not found here, and his six months of home confinement
 26 followed 20 months of freedom to travel and reside where he wished. *See* Section IV.E. We

1 respectfully submit that no such period of home confinement is needed or appropriate here,
 2 particularly in light of Mr. Zhao's extraordinary remediation, acceptance of responsibility, [REDACTED]
 3 [REDACTED], which should result in a sentence no worse than the probation served by the other
 4 founders of BitMEX, one of whom (the U.K. citizen) was allowed to reside and travel abroad
 5 without restriction. *See U.S. v. Delo*, No. 20-cr-500 (S.D.N.Y. 2022), Dkt. 360, Dkt. 380.

6 To the extent the Court determines that a period of home confinement is necessary,
 7 however, counsel for Mr. Zhao has consulted with a highly reputable U.S.-based global security
 8 firm with extensive judicial and law enforcement experience that designs and administers home
 9 confinement, including the home confinement in the U.K. served by Mr. Black in the *Connolly*
 10 case discussed above. This security firm has prepared a plan for supervision of home confinement
 11 in the UAE which the Court could impose here. Further detail regarding this proposal is included
 12 in Ex. E.⁷⁵ We include this information as a further demonstration of Mr. Zhao's commitment to
 13 accepting responsibility and not seeking special treatment, even though such a condition is
 14 unnecessary in this case because probation is the appropriate sentence.

15 **G. The Remaining 18 U.S.C. § 3553(a) Factors Also Support Probation**

16 **1. Deterrence**

17 Mr. Zhao is a first-time offender who presents no meaningful risk of recidivism. He does
 18 not need to be specifically deterred from re-offending. Mr. Zhao's life has already been
 19 fundamentally altered by his guilty plea. He has resigned from his role at the Company he founded
 20 and turned over Binance to new management. He has already paid significant fines of \$100
 21 million, with more to be paid in the coming months, on top of the billions that the Company has
 22 committed to pay at his direction, and he has been subject to presentence conditions of release that
 23 have limited his ability to travel beyond the United States—separating him from his family in the
 24

25 ⁷⁵ While Probation noted as a general matter that it did not believe private supervision outside of the United States
 26 would hold Mr. Zhao sufficiently accountable to the Court, Sentencing Recommendation, at 7, the detailed
 supervision proposal included here for the Court's consideration—which Probation did not have an opportunity to
 review—demonstrates that supervision at Mr. Zhao's home would be at least as strict as supervision in the United
 States, if not more so. *See Ex. E.*

1 UAE—for over five months. His personal and professional relationships, and the opportunities
2 available to him in the future as a convicted felon, have been fundamentally altered by this case.

3 Moreover, the scale and scope of this landmark matter already act as a significant deterrent.
4 Public reporting in the aftermath of the global settlement indicates that the Company’s \$4.3 billion
5 fine, to which Mr. Zhao agreed, was intentionally “set at a high level to act as a deterrent to other
6 groups,” according to a CFTC Commissioner.⁷⁶ Surrendering his leadership position with the
7 Company and committing it to significant additional compliance undertakings and a monitorship
8 also fulfill this goal. With such meaningful deterrents already in place, imposing an unduly harsh
9 sentence on Mr. Zhao is unnecessary and would not serve to further deter the public from
10 committing a similar offense. In fact, it could have the opposite effect, deterring other defendants
11 from engaging in the kind of acceptance of responsibility and cooperation found here.

12 The government’s legitimate interest in deterrence must be balanced against the
13 characteristics of the individual defendant and case. *See U.S. v. Barker*, 771 F.2d 1362, 1369 (9th
14 Cir. 1985) (vacating multiple sentences after finding the district court was “motivated by the desire
15 for general deterrence to the exclusion of adequate consideration of individual factors”). The Ninth
16 Circuit has held that it is a “categorical imperative that no person may be used merely as an
17 instrument of social policy, that human beings are to be treated not simply as means to a social end
18 like deterrence, but also—and always—as ends in themselves.” *Id.* at 1368-69.

19 Mr. Zhao’s sentence cannot be predicated solely on the government’s interest in deterring
20 similar activity by others in the future. Any sentence must take into account Mr. Zhao’s individual
21 characteristics, all of which favor a sentence of probation. As Judge Koeltl of the SDNY noted in
22 regard to general deterrence in sentencing the former CEO of BitMEX in May 2022:

23 [A]ny sentence must be just for the individual defendant. If we impose the sentence
24 on the basis of general deterrence that wasn’t just for the individual defendant, we
25 would end up using the law to impose sentences on individuals that were not just
for the individual defendants, and that would be contrary to our law. So you expect

26 ⁷⁶ *Binance’s \$4.3bn fine was set high as a warning, says US regulator*, FINANCIAL TIMES (Dec. 5, 2023), available at <https://www.ft.com/content/81bdaf30-3f61-4ff4-b579-805a4af8f8e1>.

1 that a sentence which is just for the individual defendant will be sufficient for
 2 purposes of general deterrence, and *you ought not to be able to attempt to justify a*
 3 *sentence based upon the message that it sends to others unless you can say that the*
 4 *sentence is just for the individual that you're sentencing.* Otherwise, you're just
 5 using that defendant in a way that's not just for the individual defendant.

6 *U.S. v. Hayes*, No. 20-cr-005 (S.D.N.Y. 2022), Sentencing Tr. at 51:12-25 - 52:1 (emphasis added).
 7 As in that case, the government here cannot justify imprisonment of Mr. Zhao “based upon the
 8 message that it sends to others.” *Id.* at 51:22.

9 At the government’s November 21, 2023 press conference announcing this matter, the
 10 Deputy Attorney General stated that “[t]oday’s charges and guilty pleas—combined with a more
 11 than \$4 billion financial penalty—sends an unmistakable message to crypto and defi companies:
 12 if you serve U.S. customers, you must obey U.S. law.”⁷⁷ Said another way: the government has
 13 already publicly broadcast its message of general deterrence, accompanied by unprecedented
 14 financial penalties and extensive compliance requirements. Mr. Zhao cannot and should not be
 15 used to continue pushing that message in the form of a sentence harsher than any previously handed
 16 down for similarly-situated defendants, and he certainly should not be punished more severely
 17 simply because the government has branded him—and his Company—as its largest target to send
 18 such a message.

19 **2. Protection of the Public**

20 No incarceration is necessary to protect the public from Mr. Zhao. He did not steal from
 21 or aim to harm anyone, PSR ¶ 53, and there is no basis to conclude that Mr. Zhao presents any
 22 ongoing risk to the public—a fact which the government itself has already acknowledged and

23 ⁷⁷ *Binance and CEO Plead Guilty to Federal Charges in \$4B Resolution*, DOJ Press Release (Nov. 21, 2023),
 24 available at <https://www.justice.gov/opa/pr/binance-and-ceo-plead-guilty-federal-charges-4b-resolution>. In fact, in
 25 response to a reporter’s question as to whether the government’s resolution with Binance and Mr. Zhao was
 26 significant enough when “there might be a situation in which nobody goes to jail,” the Acting Assistant Attorney
 General did not say that anyone should or would or needed to go to jail, emphasizing instead that the financial
 penalties, guilty pleas, monitorship, cooperation, and requirement that Mr. Zhao step down as CEO had already
 made it a very significant resolution that clearly communicated the requirements of U.S. law to the global industry.
 See *Binance and CEO Plead Guilty to Federal Charges in \$4B Resolution*, DOJ Press Release (Nov. 21, 2023), at
 31:04 - 33:01, available at [https://www.justice.gov/opa/video/binance-and-ceo-plead-guilty-federal-charges-4b-](https://www.justice.gov/opa/video/binance-and-ceo-plead-guilty-federal-charges-4b-resolution)
[resolution](https://www.justice.gov/opa/video/binance-and-ceo-plead-guilty-federal-charges-4b-resolution).

1 stated on the record in connection with bail. *See* Dkt. 29. Probation, too, agrees that “he does not
2 seem to be a continued danger to the community.” Sentencing Recommendation, at 7.

3 **3. Needed Training or Rehabilitation**

4 Mr. Zhao does not require any special training or rehabilitation. Moving forward, he seeks
5 to focus primarily on devoting time to his family and giving back to his local community, as well
6 as pursuing new philanthropic projects outside the cryptocurrency space, particularly in global
7 youth education and biotechnology.

8 **4. Seriousness of the Offense, Respect for the Law, and Just Punishment**

9 Mr. Zhao recognizes that his BSA violation is a serious offense and accepts full
10 responsibility. He understands the gravity of his actions and is committed to accepting a just
11 punishment. That is why he traveled here from a non-extradition country to plead guilty. But this
12 is Mr. Zhao’s first encounter with the justice system, and he has no criminal history. As discussed
13 above, and as noted in the PSR, Mr. Zhao has demonstrated extraordinary acceptance of
14 responsibility [REDACTED]

15 [REDACTED].

16 A sentence of probation here is just punishment and will promote respect for the law.
17 Among the relevant considerations is the degree of harm caused by the defendant’s conduct. *See*
18 *U.S. v. Harder*, 144 F. Supp. 3d 1233, 1240-41 (D. Or. 2015) (“With regard to the concept of ‘just
19 punishment,’ it is fair to conclude that the punishment must fit the crime; that includes an
20 assessment of the harm caused and the intentionality of the defendant . . . the Court must attempt
21 to avoid unwarranted sentence disparities among defendants with similar criminal records who
22 have been found guilty of similar conduct.”). Here, while Mr. Zhao’s offense was serious, he did
23 not in any way steal from or aim to harm anyone. Failing to implement an effective AML program
24 is not the same as engaging in money laundering, much less fraud or misappropriation of customer
25 funds.

1 As discussed above, “the collateral effects of a particular sentence” must also be taken into
 2 account. *U.S. v. Stewart*, 590 F.3d 93, 141 (2d Cir. 2009). Mr. Zhao has surrendered control of
 3 the Company he founded and has sustained significant reputational damage in light of his
 4 conviction—factors that courts have determined favor leniency. *See U.S. v. Anderson*, 533 F.3d
 5 623, 633 (8th Cir. 2008) (affirming district court’s downward departure where defendant “suffered
 6 atypical punishment such as the loss of his reputation and his company”); *U.S. v. Lewis*, No. 23-
 7 cr-370 (S.D.N.Y. 2024), Sentencing Tr. at 30:18-31:1 (sentencing defendant to probation abroad
 8 where the “case has garnered significant press” and “the damage to [the defendant’s] reputation,
 9 along with the embarrassment and shame that [the defendant] has acknowledged . . . is certainly a
 10 deterrent”).⁷⁸

11 In light of Mr. Zhao’s fulsome acceptance of responsibility, [REDACTED] history of
 12 philanthropy and community building, the lack of precedent for sentencing any similarly-situated
 13 defendant to prison, and the collateral consequences from his conviction, a probationary sentence
 14 here both is just and will promote respect for the law, especially by incentivizing others to follow
 15 Mr. Zhao’s example and fully accept responsibility, remediate, [REDACTED]. The government
 16 has used this case to send “an unmistakable message.”⁷⁹ The Court can, too. The message should
 17 be that unflinching acceptance of responsibility matters. Self-surrendering voluntarily from a non-
 18 extradition country matters. Remediation matters. [REDACTED] The public should know
 19 that the U.S. justice system is capable of nuanced, individualized assessments, and that defendants
 20 who take every possible step on the right path will be recognized with lenience.

23 ⁷⁸ Moreover, the Sentencing Commission has recently recognized that many defendants with no criminal history
 24 should be afforded leniency, recognizing that data show such defendants are less likely to recidivate. *2023*
 25 *Amendments in Brief*, U.S. SENTENCING COMM’N, available at [https://www.usc.gov/sites/default/files/pdf/](https://www.usc.gov/sites/default/files/pdf/amendment-process/amendments-in-brief/AIB_821R.pdf)
 26 [amendment-process/amendments-in-brief/AIB_821R.pdf](https://www.usc.gov/sites/default/files/pdf/amendment-process/amendments-in-brief/AIB_821R.pdf). The Sentencing Commission’s clear policy and
 recognition that defendants like Mr. Zhao do not commit additional crimes provide further support for a sentence of
 probation.

⁷⁹ *Binance and CEO Plead Guilty to Federal Charges in \$4B Resolution*, DOJ Press Release (Nov. 21, 2023),
 available at <https://www.justice.gov/opa/pr/binance-and-ceo-plead-guilty-federal-charges-4b-resolution>.

V. CONCLUSION

This is a high-profile matter, but Mr. Zhao still deserves to be sentenced based on the facts of his case and his personal circumstances. He is a first-time, non-violent offender who committed an offense with no intention to harm anyone. He presents no risk of recidivism. He has appeared in this country voluntarily to accept responsibility. He has already suffered enormous collateral consequences. Despite the initial failures that led to this prosecution, he has transformed Binance into an industry leader on compliance. These factors appropriately led Probation to recommend a modest downward variance. The Court should go farther to reflect three additional, crucial factors. [REDACTED] it is exceedingly rare (if it *ever* happens) for such a first-time offender with a Guideline range comparable to Mr. Zhao's to be sentenced to a term of imprisonment after pleading guilty, especially pre-indictment. He would face harsher and more dangerous conditions of confinement than a similarly situated U.S. citizen. And all relevant BSA precedents point to a sentence of probation. For these reasons and the others set forth above, a sentence of probation is just and appropriate, in line with precedent, and not greater than necessary to accomplish the goals of sentencing Mr. Zhao as an individual, based on the totality of facts and circumstances and his lifetime of good works.
